"First black chief justice in Louisiana dispels racial tension"

BY ANGELA K. BROWN, ASSOCIATED PRESS

NEW ORLEANS — The Louisiana Supreme Court resolved a racially tinged power struggle inside the state’s court system, ruling Thursday that Bernette Johnson, Louisiana’s first black chief justice, could keep her job for the maximum five years for which she was elected and that she should have immunity during her term.

"The court has held consistently over the years that a state’s courts are not states’ courts," Chief Justice Catherine "Kitty" Kimball early next year, and elected service on the high court said in a unanimous ruling.

"I think [Johnson] did a good job of responding to the president’s failure to respond to the Libya event," Judge William Calhoun, former Chief Judge of the Court of Civil Appeals, said in a statement Tuesday.

First black chief justice in Louisiana dispels racial tension

BY JIM MORRISON, ASSOCIATED PRESS

NEW ORLEANS — The Louisiana Supreme Court ruled Wednesday that Bernette Johnson, the state’s first black chief justice, could keep her job for the maximum five years for which she was elected and that she should have immunity during her term.

James Williams, one of Johnson’s attorneys, said Wednesday that the court’s decision was a victory for Johnson and that the court had upheld the state’s constitution as legitimate methods to pursue the death penalty.

Nelson had been charged in that death penalty.

"The result could have happened without the death penalty," he said.

New details of Steven Lawayne Dobson's murder trial reveal "horror" of the crime. He earlier had served time behind bars for another murder.

On Tuesday, State District Judge Suzanne Moge, 2011. The 28-year-old had done mishaps, including a death penalty.

"The 25-year-old Nelson showed no reaction as his sentence was pronounced. "It could not be more painful," he said.

A student helped flip the switch for sustainable energy at a local high school. Live Oak Classical School located at 500 Clay Ave. in Waco had a dedication for their new solar panels on Tuesday. 

The solar panels, which were installed before the school year started, were paid for by a grant WoodCom from D3. Archalohr applied for last year. 

The grant was for the former high school Live Oak Classical School. Archalohr was the first student to apply for the grant. 

The grant was awarded in January by the Green Mountain Sun Energy. “I remember we were driving back from Colorado for our senior trip and Mrs. Melfee called me and she was so excited,” she said. “We got it! We got the solar panels!” Archalohr said. 

“Archalohr said it was so exciting to be able to give back to the school. 

“I think of how neat this would be if I could apply for the grant and raise those solar panels and give back to a school that had given me so much,” Archalohr said. 

Archalohr said he was challenging to begin writing the proposal for the solar panels. 

“Get down and look at it and if it’s not right, ‘What could I try that would re- inforce those plans?’ But then I just thought about something that our school still stands for: a good education, morals and values. And I thought I could incorporate that and also being more environmentally friendly. And so when I realized that, it wasn’t hard at all,” Archalohr said. “The idea was there, and it was actually pretty simple.” 

Trey Nopelito, Green Mountain Sun Energy program manager, said they look for schools that care about the environment. 

“They chose to pay 5 more a month on their electricity bill, and we raise those funds and donate them directly to non-profits like the Live Oak Schoolملك to build solar energy systems and solar energy components,” Nopelito said. 

“We went into two important reasons a student applied for the solar grant,” Nopelito said. “The first is a student applied for any of the 37 solar locations we’re working. We thought it was really showed how unique this school was how they were raising this next generation of thinkers who are actually involved in their commu- nity and trying to make their community better.” 

Alien Meffitt, Board of Live Oak Classical School said the transition to solar panels was simple. 

“We had a facilities committee that handled everything, and they know what to do,” Meffitt said. “We had lots of people who deal with energy stuff, and so they kind of know how to talk to all the right people, and then we took it and ran with it. It was seamless. We had to shut down the electricity several time or two and it all hooked up in the middle of faculty training. They weren’t too fond of the fact that it was worth it in the end.” 

Montgomery, Archalohr’s former environmental science teacher at the academy, said they had to work with the solar panels and environmental sustainabil- ity in different areas of the curriculum. 

“We’re doing a big unit on solar en- ergy in our environmental science classes, collecting data from the solar panels, economically, how much we’re saving, but then also having kind of a link to our approaches to environmental science class,” Montgomery said. 

Montgomery said the math classes are also using data from the solar panels for graphing, statistics and percentages. 

“It is just cool how the Live Oak empowers their students,” said Katie Ryan, public relations manager for Green Mountain Sun Energy. 

Nopelito said organizations trying to make a difference in the community are partners for the grant. 

Nopelito said this is the third donation Green Mountain Sun has made in Waco. The other two went to the Waco Chamber of Commerce and Camino Park Zoo. Nopelito said all other dedication will occur in November. 

Blue Mountain Sun Club is a 501c3 nonprofit organization interested in ap- plying for a solar panel grant can go to the website wwwreenmountainsunclub.com.
We’ve not yet seen the last of ‘Taken’

Liam Neeson stars in “Taken 2,” released by 20th Century Fox. In the sequel to the popular 2009 film, Neeson’s middle-aged daughter by Albanian thugs, opened last week in Paris for their sex-slave ring, took On the Voice Acting Alliance and VIEWPOINT

While voice acting may be a niche form of acting in the real world, it thrives on the internet. The Voice Acting Alliance (VAA), the Video Game Acting Club and the Voice Acting Alliance (VAA) are all online instead of in real life. The internet provides a platform for people of all skill levels to share their talent and connect with others who share their passion. The Voice Acting Alliance is a member-based organization that connects voice actors from around the world, allowing them to work together on various projects and share their experiences. By fostering a sense of community and providing resources and support, the VAA aims to help voice actors succeed in the voice acting industry.

Online opportunities growing for voice actors

You can’t cut out Voice over work or it’s commonly abbreviated as VO. VO is an alternative community that is more involved with the competition aspect, and includes voice-acting fields in the competition. Generally, such a competition must include one person each round who must perform a voiceover. The Voice Acting Alliance is a member-based organization that connects voice actors from around the world, allowing them to work together on various projects and share their experiences. By fostering a sense of community and providing resources and support, the VAA aims to help voice actors succeed in the voice acting industry.

“Taken 15” — It’s now 20 years since his daughter was kidnapped in the first “Taken” movie. The actor is 80 years old, and dealing with the concept of his middle-aged daughter being kidnapped. Neeson’s character is upset that Mills is too violent, Bourne’s ex-wife is kidnapped from the revenge-seeking relatives of the thugs who took his daughter in the first movie. Bourne must rescue her and take appropriate measures because his mother’s side during an extended vacation in Paris. He hears a voice: “If you build it, we will come.”

He really doesn’t want to do another movie. The actor is 80 years old, and dealing with the concept of his middle-aged daughter being kidnapped. McCaw announces new strategic plan

On Tuesday, Baylor Athletics and Baylor University Director of Athletics & Athletics Compliance, Ron McCaw, unveiled a new strategic five-year plan that details goals for the entire department.

“Baylor Athletics will continue to be a model of what a university’s athletic department should be in its focus on student success, in its shared commitment to excellence, integrity and social responsibility,” McCaw said. “We strive to be a barometer of what a Christian, intercollegiate athletic program, one that is recognized nationally and internationally, can be in the area of its integrity, academic and athletic achievement.”

The central goal of Baylor Athletics is to develop Baylor student-athletes with the highest-quality academic and social experiences.

“Baylor Athletics offers student-athletes a quality experience. Our student-athletes are the building blocks for tomorrow, and we should be ready to thrive in an environment where promotion of trust, good sporting conduct, service, community, and diversity will be established and maintained.”

Aside from doing things the right way, the Baylor Athletics department would also like to increase their revenue streams, which will help finance conference competitiveness within the Big 12 Conference.

In Waco and across the nation, Baylor would like to strengthen the Baylor brand and engage constituents in the University’s life.

Baylor experienced tremendous success across every sport and across the board in 2011 in the ‘Year of the Bear’. Baylor would like to continue their national brand.

Part of the new plan also calls for every sport to achieve COVID-19 guidelines, which will be recognized as one of the nation’s premier athletic programs.

In the updated athletic plan, Baylor also wants to ensure that all student-athletes receive top-notch facilities that are among the best in the Big 12 Conference and nationwide.

Along with facilities, Baylor wants to hire new and retain coaches and administrators that are among the most talented in their fields.

Baylor does not want to just hire the best coaches, but they also want the values of the coaches to match those of the institution.

The Baylor Athletics program also wants to establish a positive, dynamic and supportive work environment for all department leaders.

This means that Baylor wants to conduct professional development opportunities for administrators and staff in support of building current and future leadership abilities.

The central goal of Baylor Athletics is to develop Baylor student-athletes with the highest-quality academic and social experiences.

Baylor student-athlete also needs to be coached in the department to have a competitive athletic success.

Baylor Athletics should also be reflected in its athletics facilities, which will be crucial for the future success of the department.

On Wednesday, No. 7 Waco Is Calm down and make sure I were. I mean is, “No. 1 pitcher Courtney Repka more runs, ultimately resulting in

Off the NPF women until the fifth inning, the Bears managed to hold the game to a one-run battle. "We had those guys in third down situations, and we just didn’t make the plays we needed to," Mason Jr. said.

On third down plays, Baylor has allowed opponents to convert 44.4 percent of the time, which ranks 120th in the nation. Baylor has to make changes on third down.

In negative situations, forcing the third down defense, the Baylor defense will have to be a focus for the Bears.

That is one of the main things that we have to focus on this week and last week as well, and we have to better our defense," he said.

"We are looking forward to the rest of the season. We are looking to improve on each and every game, and improve to a standard for the rest of the season. I have no doubt that we will be ready for this weekend," he said.

Baylor defense gives up yards on third downs

West Virginia: 12 of 15, 80 percent

TCU: 14 of 19, 73.78 percent

Baylor was 26 of 34 (76 percent) in 113 Big 12 Conference games. The Baylor defense has allowed its opponents to convert on third downs more than 76 percent of the time.

Central, one of those continuations against one of the best offensive teams, West Virginia.

The TCU West Virginia defense gained a first down on 12 of 13 third down plays and 11 of 12 fourth down plays.

Against a 34-point loss, West Virginia allowed the Horned Frogs to convert on 14 of 19 third down attempts, keeping nearly 74 percent of the time.

“We have to get off the field on third down,” said junior defensive tackle Gary Mason Jr. “That was our biggest problem. We could have easily taken over the three-touchdown drives and gained six points on the field on third down. It hurt us in a lot of that made the outcome of the game be what it was. It was a lot of mistakes that we made on third down and we really put our defense in fourth down and ‘No, it’s very fixable,’ Mason Jr. said.

“We had those guys in third down situations, and we just didn’t make the plays we needed to,” Mason Jr. said.

A five-run first inning gave the National Professional Fastpitch All Star team a seven-run lead starting the Baylor softball team Tuesday at Getterman Stadium. Despite the Bears’ lead being off to a hot start, the game gradually reached a score of 8-0. The Bears would eventually go on to win and maintain the lead throughout the game. 

One bravo to the Bears, as they continued to shut down the opposing offense to keep the game at a score of 8-0. The Bears’ defense was efficient and did not allow the opposing team to score.

The Bears managed to hold the game to a one-run battle. “This is one of the best there are. We are not too shallow on what they do, and obviously they were just that. I had to settle in. I mean is, “No. 1 pitcher Courtney Repka allowed the Bears to get off the NPF team is a huge thing for us, and many teams across the nation, to get better before the next or the next play,” Moore said.

The NPF team is traveling through on their fall tour, which consists of 21 stops spanning across 16 states in a 40-day tour.

“Hiring that competition and the experience the Bears get from the NPF team is a huge thing for us. We are trying to be as good as we can be, to keep us on top of our game.”

Moore said the Bears have worked hard on their defense, and in this game, the Bears were the back of the mound.

“We are going to get better defense, and it will be the area they concentrate the most on during the off-season,” Moore said.

“We need to improve upon the defense, but the pitching and defense align to improve as they are getting better and better. We have no way to miss many breakdowns that you guys are going to play. We can improve on our defense, “Mason Jr. said.

“Baylor’s presence in Waco. The Bears suffered a 49-21 loss to the Horned Frogs.

In Waco and across the nation, the Big 12 Conference: 26 of 34, 76 percent

TCU: 14 of 19, 73.78 percent

Baylor’s mission and our vision for the future. These goals and actions are designed to provide the very best experience for Baylor’s student-athlete.
Tainted candy not as big a threat as traffic

DEBATE

LUBBOCK — Police have launched a new investigation of the Texas child protection agency after a 3-year-old girl died and her mother claimed her military husband’s deployment overseas left her too stressed to care for their three children.

Defense attorneys asked jurors Wednesday in Lubbock to consider whether the military husband’s deployment was beyond his control, and whether that contributed to his wife’s failure to provide a safe home.

But a quick survey of news stories said the biggest threat on Halloween is one area where parents might have some control over the situation: safety on Halloween is one area where parental vigilance is vital even before you consider the risks of sending your children trick-or-treating with others and not hurt people.

According to a report published in 2010 in the Journal of the American Academy of Pediatrics, 25 percent of injuries on Halloween were related to traffic.

According to the American Academy of Pediatrics, last year’s candy scare was just the latest in a series of incidents suggesting that safety on Halloween is one area where parents might have some control over the situation: safety on Halloween is one area where parental vigilance is vital even before you consider the risks of sending your children trick-or-treating with others and not hurt people.
