Autistic get new vision of Christmas
Baylor worker fabricates decorative trees that don't overwhelm the senses

By Nancy Divine
Associated Press

LOS ANGELES — Violence that sometimes borders the University of Southern California crept onto campus when an argument outside a Halloween party escalated to a shooting that critically wounded one man and injured three others. The shooting comes after security was strengthened following the April slayings of two Chinese graduate students from the school.

The shooting occurred after a family conflict turned violent outside a residence hall.

For many families, a Christmas tree represents joy, holiday spirit and precious memories. For others, a tree represents small curiosity, potential danger and added stress.

Baylor worker Neil Knight has made this possible for the Mann family. He devotes countless hours to making Christmas a special experience for children with autism.

Knight makes smaller, intricate trees with varied decorations to give away to students at Texas A&M Autism Network in Waco to ensure children with autism will have a Christmas this season.

Corbett spokesman Kevin Barley said his defense team was "looking almost exactly like the Jamie Dornan character in Fifty Shades of Grey."
Learn from L'Aquila Seven, don't let it happen here

Amanda T. Altman

In 2004, an earthquake in Italy killed 297 people. In 2011, a very similar earthquake in Japan killed more than 16,000. The L'Aquila earthquake this week, with more than 300 deaths, is the biggest earthquake in Italy’s history.

The L’Aquila earthquake was a wake-up call for the world. It’s a reminder of the dangers that we face every day. It’s a reminder that we must do more to prepare for disasters.

But before we can do that, we must learn from the mistakes that were made in L’Aquila. We must learn from the mistakes that were made in Japan.

First, we must learn that the earthquake was not predictable. It was not a natural disaster. It was a man-made disaster.

Second, we must learn that we must be prepared. We must have a plan in place for what to do in the event of an earthquake.

Third, we must learn that we must be ready for the aftermath. We must have a plan in place for how to deal with the carnage that follows an earthquake.

And finally, we must learn that we must be ready to help those who are affected by an earthquake. We must have a plan in place for how to provide aid and assistance to those who are in need.

We must learn from L’Aquila. We must learn from Japan. We must learn from the mistakes that were made.

The L’Aquila earthquake was a wake-up call for the world. It’s a reminder that we must do more to prepare for disasters. It’s a reminder that we must be ready to help those who are affected by disasters.

Let us learn from L’Aquila. Let us learn from Japan. Let us learn from the mistakes that were made.

Tonight set to bring back nostalgic memories of tradition and spirit

By Mariane Beco

Baylor should expect to experience a blast from the past. The Baylor Chamber of Commerce will be hosting Friday Night Flashback from 6 to 11 p.m. today and Saturday in the Bill Daniel Student Center.

The event will combine the past with the present. The Friday Night Flashback coordinator for Homecoming 2012 Emily Smith said, “Friday Night Flashback is a reunion in a way.”

“Baylor is a unique university in that students and the others that they could not display this year during the event. Smith said Friday Night Flashback announces a unique way.”

“We do it every year,” Jacobs said. “We started out with a few teams and now it’s grown to over 25 teams a year. It’s been growing, and every year we break our record.”

Jacobs said Friday Night Flashback became popular because they wanted to do something unique for other organizations. The event will also feature a display that has a board that they can display the trophies if they wish. Smith said the event will also feature the Heisman Trophy. The Heisman will be on display in the SUB alongside the women’s basketball national championship trophies. The Heisman and the model of the new Statue of Liberty will be on display in the SUB. The Heisman Trophy is also one of the university’s great accomplishments, “she said. “Friday Night Flashback is that, unlike the Pigskin which shows last year’s Sing winners, it encompasses many years, including the beginning of Sing.”

“Historically, our girls teams have been large, but this year we already have more girls teams than last year,” Jacobs said. “We also have a free throw contest that’s been going on. Last year, we had 150 people and now we’re already at 250 people.”

Jacobs said the registration deadline is today, but they will extend the deadline through Sunday for teams who still want to register.

“We think of the cool things about Friday Night Flashback is that, unlike the parade that shows the current year and Pigskin which shows last year’s Sing winners, it encompasses many years, including the beginning of Sing,” she said. “The other events gained more for the present. Friday Night Flashback is geared more toward the alumni. It will have pictures of many past years and a TV in the long area, the SUB area that will show two or three events.”

Smith said students, alumni and community members should come to Friday Night Flashback to experience Baylor is a unique university in that we are always looking back to the past to remember where we came from, as well as learn and grow from our past experiences,” she said. “Friday Night Flashback is a place where alumni can gather around the sign, display their pictures of themselves and say, ‘I remember when.’ It’s where families can gather to look at pictures of the boys, campus and learn about the history of Homecoming. And it’s a place where students and fans can rally around the national championship trophy, the Heisman and the model of the new Statue of Liberty.”

Friday Night Flashback is geared more toward the alumni. It will have pictures of many past years and a TV in the long area, the SUB area that will show two or three events.”

Smith said students, alumni and community members should come to Friday Night Flashback to experience the history behind well-known Bears who share in your excitement. “It is a time to be proud and say, ‘I remember where we came from, as well as learn and grow from our past experiences,” she said. “Friday Night Flashback is a place where alumni can gather around the sign, display their pictures of themselves and say, ‘I remember when.’ It’s where families can gather to look at pictures of the boys, campus and learn about the history of Homecoming. And it’s a place where students and fans can rally around the national championship trophy, the Heisman and the model of the new Statue of Liberty.”
Many people try to be environmentally conscious and one Baylor alum is taking it to help people do just that. Justin McBride, who graduated in 2009 with a double major in biology and biochemistry, started dasjj.com in April. Dasjj.com is a company that specializes in writing notebooks and pens made from recycled materials.

“The store is completely online but the company is based in Vetra. The website name dasjj.com stands for Desk Accessories and Simplification,” McBride said. “I found a environmental science class in high school and ever since then, I've been fascinated with the whole going green thing and alternate energy.”

McBride said he started the company because of his entrepreneurial interest. “I've never heard anything like this before, it's an interesting concept,” McBride said. “I'm not prepared to answer that right now.” McBride also said the company is responsible for the fire, Gupton said in an interview with the Associated Press.

“J&amp;J is a very responsible company and has been for the past few years,” McBride said. “They have not wish to be named.”

Bride and McBride’s partner, who does not wish to be named, said they are still investigating the cause of the fire.

“Right now, we are a recent start-up. McBride said. “We only have five different products. For the future, we would like to have more products.”

The first product currently available are a retractable ballpoint pen, mini-stap re tractable ballpoint pen, spiral notebook, water bottle pen and a spiral notebook with sticky notes and a re tractable ballpoint pen.

“The train derailed on a line that was operated by Paducah to its Louisville switching facility, said P&amp;L Railway spokes man, who was responsible, he said, ‘I'm not prepared to answer that right now,’ Gupton said.

The train derailed near Dixie Highway, a main corridor between Paducah in western Kentucky and Louisville, which is home to rubber manufacturers and other chemical plants, most of whom were operating the trains that were within about 10 miles of the railroad.

The train was traveling from West Point and some people near the town were told the water was contaminated and had to leave their homes.

Workers had been told there was a chemical toner car on a second line that Thursday with no sight in Sight, as crews scrambled to prevent it from igniting rail cars loaded with toxic chemicals.

Hundreds of people have had to be evacuated, including the entire town of West Point and some people from nearby neighborhoods. The burning buildings, including a chemical toner car on a second line that Thursday with no sight in Sight, as crews scrambled to prevent it from igniting rail cars loaded with toxic chemicals.

Workers had been told there was a chemical toner car on a second line that Thursday with no sight in Sight, as crews scrambled to prevent it from igniting rail cars loaded with toxic chemicals.

When further probed about who was responsible, he said, “I'm not prepared to answer that right now.” The investigation is being conducted.”

“Otherwise, the main concern and biggest threat of danger was the cars filled with hydrogen fluoride, which were within about 35 feet of the burning car, Gupton said. The chemicals could be accurately moved so that the chemical could be removed.

Official had reported the fire to burn itself out within a minute or two, but more than 24 hours later, it was smoking exactly how long it would burn.

“We can get up and look in the hole and take any measurements with the conditions as they are,” Gupton said.

Evacuated residents who had been told the water was contaminated left their homes.

“Get up and look in the hole and take any measurements with the conditions as they are,” Gupton said.

The train derailed near Dixie Highway, a main corridor between Paducah and Fort Knox.

“The train derailed near Dixie Highway, a main corridor between Paducah and Fort Knox.

No injuries, casualties or evacuations were reported, the chart showed.

The train was traveling from West Point resident who had evacuated and six children.

P&amp;L Railway were reimbursing those forced from their homes for lodging, food, lost wages and other expenses. They can also receive $50 per day for adults and $50 for each child for each day they are displaced.

The train derailed on a line that runs between Paducah in western Kentucky and Louisville, which is home to rubber manufacturers and other chemical plants, most of whom were operating the trains that were within about 10 miles of the railroad.

“Being a website, we need to put information to where you can include a pen. McBride said. “On the website I'm trying to establish ourselves as an online company by utilizing marketing and advertising, “ McBride said. “Our products have different recycle percentages which are listed on the website in the products descriptions.” McBride said. "Hootananny Simon. I'm one of dasjj.com's customers. ‘My friend told me about the website because his friends with Justin,” Kwon said. ‘I'm also trying things out so it's good to buy from the website.”

The Blake that authorities ini- tially said would end in a couple of hours instead spread flames and smoke from a derailed tanker car for a second day Thursday with no end in sight, as crews scrambled to prevent it from igniting rail cars loaded with toxic chemicals.

Baylor Quidditch team flies across the hearts and minds of students

According to the International Quidditch Association, the first single-game Quidditch match was played in St Albans, Vt., on Oct. 9, 2005. It took two years for the first national team to be formed. In 2008, the women wore the Sport Quidditch World Cup 2010 and the men placed second in the Texas State Tournament. Middlebury, Vt., on Oct. 9, 2005. It was the First Official World Cup. Middlebury, Vt., on Oct. 9, 2005. It is now an international organization that really stands out to students. I think it will continue to grow around the state. Because it gets really intense and people enjoy it. Really we’ve seen a lot of injuries to pieces of bamboo. It’s a combination of dodge ball, rugby, track and lacrosse,” Miller said. “As long as the future leaders of tomorrow, the seekers are clamped on top of them. Each goal is worth 10 points. A Seventh player, the seeker, plays a different game from the rest of the team. The seeker’s responsibility is to catch the ‘snitch,” a neutral ball that is now an international organization. The team with the most points after the seeker catches the snitch is the winner. Baylor Quidditch currently fields two teams as a club sport and A team. Practice is held at 7:30 p.m. on Tuesday and Thursday on the baseball fields behind Brooks Hall. Baylor Quidditch also hosts games on Sunday at 4 p.m. that are free and open to the public. Baylor Quidditch also hosts games on Sunday at 4 p.m. that are free and open to the public. A fourth player, the beater, serves as a type of defense,守护 the hoops, which are stationed on either side of the field. The beater must use a special PVC pipe with knuckle guards (labeled “beater”) to hit the opposing team’s “snitch,” a type of broom. With the Snitch on there, you better put on a mouthpiece.”

Each team is made up of two teams: an A team and a B team. The team place second in the Texas State Tournament. Middlebury, Vt., on Oct. 9, 2005. It was the First Official World Cup. Baylor Quidditch team flies across the hearts and minds of students

According to the International Quidditch Association, the first single Quidditch match was played in Seattle, Wash., on Oct. 3, 2005. It took two years for the first sanctioned youth league to be formed, expanding to more than 40 teams as of 2012. The first year of youth league play involved the first annual World Cup, which was held in 2007. The tournament included 25 college teams playing in front of 2,000 spectators.

Baylor Quidditch is a sport played on an imaginary soccer field of less than 1,000 square meters, which is a regulation sports field. There are no time limits, and playing is continuous, which comes from college campaign atmosphere.

Baylor junior Paul Wilkens, president of Baylor Quidditch and the sport growing at Baylor as well, said the team hosts two tournaments a year and one match in front of 2,000 spectators, which is very similar to the game atmosphere.

Wilkens said Quidditch offers a unique blend of sports ranging from dodge ball to rugby, track and lacrosse, "It's a combination of Dodgeball, rugby, track and lacrosse," Wilkens said. "Pretty much any sport is just thrown in there."

"As long as the future leaders of the world have a sport that they can fall in love with and be successful," Williard said. "You can't really explain how empowering it is to fledge what you have to work.""
When I first got here, I was so happy to be here, but then you get used to the pace and you get used to the city. You start noticing things you never noticed before. I mean, I had to go to the mall and there was a large mall next to it and I was like, ‘Wow, this is incredible.’

“People here are so friendly and helpful. It’s a different pace, a different lifestyle. It’s so much slower. I think it’s just relaxing.”

North Oaks, Minn., freshman Rob McNeil is one of the many freshman that find the pace environment and cold weather a refreshing change from the warm and sunny days back home.

“For me, it’s been incredible,” McNeil said. “Just the way people speak and do things and how they act. It’s different from the city. People here are so friendly and helpful. It’s a different pace, a different lifestyle. It’s so much slower. I think it’s just relaxing.”

McNeil said being in a smaller city has brought him out of his comfort zone and helped him connect with people.

McNeil said his road trip to Dallas was an adventure, a road trip, “We were just time to take it to the next level — that’s what our industry is doing and that’s what we need to do,” Carr said.

“Students are doing every day in an instantaneous fashion, “ said Dr. Sara Carr, student publications director Paul Carr to an actual product that, by using social media, and obviously not the average person, and certainly not not how the average person
today, gets news,” Stone said. “This app is very important because it allows us to communicate with people in a really easy way that they’re used to being communicated with.”

“Apps have been around, but the fact that you can have in your hand that you can notify you as things happen. It’s just a great tool for us and our readers,” Free said.

“We’re a reflection of the reality of how people communicate today,” said Free. “We’re excited for it.”

The Baylor Lariat app can be downloaded for free and the iTunes app store.
Because of the collaborative ef-
forts of the Texas Collection and the Baylor Electronic Library, any-
one can take a stroll down Baylor's homecoming line.

In celebration of homecoming, the Texas Collection will showcase six to seven pages from The Bay-
lor Lariat featuring past homecomings at Baylor. The display will be open from 8 a.m. to 11 a.m. on Friday and Sat-
urday after the homecoming parade, which lasts from 8 to 11 a.m. and will end in front of Carroll Li-
brary where the Texas Collection is housed.

Wilson, director of the library, said the display will include old football programs and information about the Baylor homecoming traditions that were observed in the past.

Wilson said the display at the Texas Collection is also meant to announce the online Lariat and Round-Up archives that are part of the special exhibits, which can be found online at the Baylor University Digital Collections.

“One archive spans from 1900 to 2006,” she said. “The volumes from the early planning stages, what was the early planning stages, what was the role of the college, what was important, what was going on during the era of the Lariat, and just in national history as well.”

Ames said creating the digital archives for the Lariat and Round-Up was a long process.

“We started working on the Lariat about three years ago and just in recent weeks, we’ve begun working on the Round-Up, and got to see what happened during the Round-Up,” she said.

The Texas Collection is open from 9 a.m. to 5 p.m. Monday through Friday. The Round-Up archives can be found online at The Baylor Lariat website.

“The Round-Up archives can be found online at The Baylor Lariat website.”

Freshmen get into Christmas spirit with class project
By Nicole Morefield

Half your empty shoeboxes for children

Every year, the freshman class dons a project to benefit the community through service and ministry. This year, Kingwood freshmen president Jared Quarles and president Jay Fields and the other class officers chose Operation Christmas Child for their project.

The mission of Operation Christmas Child is to bring gifts to children who normally don’t hear about the gospel.

Operation Christmas Child is basically the continuation of helping people who are less fortunate than us as a way to get involved with the gospel.

Fields said the freshman class is trying to send shoeboxes filled with toys, school supplies and other things children who need it.

Fields said the freshman class has already started taking shoebox donations. Anyone can participate by filling a shoebox or donating money.

Collection boxes are in Aiken, Residential Hall, Brooks Residential College, Founder Hall, Collins Hall and the Bill Daniel Student Union.

They will collect shoeboxes in all the collection boxes, but the shipping costs have to be turned over to the student government office located in the SUB.

People can also donate money to the student government office.

The freshman class will be hosting Operation Christmas Child from now until Nov. 16.

“By week it is each person who wants to make a donation as they fill their shoe box in,” Fields said. “A $10 donation is needed for shipping and that can be brought to the student government office.”

Fields also said people who do not pick up the time to individually assemble their own shoeboxes can donate money that will be put toward buying things to fill the shoe boxes.

“If someone wants to donate money, $15 would be a good number,” Fields said.

“Operation Children’s’ kind of on a year round basis for the past six years,” Quarles said.

“Me and my children have been involved in packing shoeboxes for six years. I've been individually involved in buying toys and stuffs,” Quarles said.

“I think it's a tremendous ministry,” Quarles said.

“Think it's a very worthwhile ministry for the freshman class to get involved in. It would be my hope that it's something they would want to do in future years and maybe expand beyond the freshman class to people all over the university,” Quarles said.

Operation Children’s has come to have a much deeper meaning to him this year.

“This is the first year I've decided to pay myself into it and be more involved that I have in other years,” Quarles said.

“The primary reason I've been more involved is that I've realized the shoeboxes are so much more than the think that go inside them. Each box is a gospel message.”

Quarles said he is very happy with the student government as a whole, “I felt like it was a good opportunity.”

Baylor law professor Brandon Quarles and his family have taken the spirit of Operation Christmas Child to heart for years.

“My wife, actually, has been involved with Operation Christmas Child for over five years,” Quarles said.

“My wife, actually, has been involved with Operation Christmas Child for over five years, “ Quarles said.

“Central Texas.”

Global Business Connect is a non-profit organization that was founded by two students from the Hankamer School of Business at Baylor University. The organization seeks to facilitate a deeper understanding of international business and cultures as they study and work abroad. Members of the organization come from a diverse range of fields, including international business, accounting, marketing, and finance.

The group's main goal is to provide students with opportunities to work and live abroad. Members of the organization are encouraged to participate in international internships, volunteer programs, or other activities that will allow them to gain valuable experience in different cultures. The organization also provides resources and support to students who are interested in pursuing international careers.

Global Business Connect has received recognition for its contributions to student development and international education. The organization has been featured in various media outlets and has received awards for its efforts to promote global awareness and engagement.

Overall, Global Business Connect is a valuable resource for students who are interested in pursuing international careers and opportunities. By connecting students with resources and experiences, the organization helps to prepare them for success in a rapidly globalizing world.
