BAA to give $1 million for students
By Karen McGlobal
The Baylor Alumni Association has confirmed that it plans to give a $1 million gift to Baylor University, the largest in BAA history.

The 26th annual Fishing Event for Very Special People was held on Saturday in the Creative Arts and Exhibits Building at the Extraco Events Center. Waco residents participated in a variety of fun activities, including fishing in an indoor pond and playing various games for prizes.

German grocery will bring discount prices to Waco
By Taren Reaves
Another lawn-care grocery store has arrived in Waco, and it’s not Walmart or H.E.B.
Aldi, a German discount grocery store, will be open for business Feb. 28 on the corner of Woodrow Avenue and Valley Mills Drive.

According to their website, Aldi opened its first store in Germany in 1946. Today there are more than 7,000 on three continents. The new Waco store will be one of over 1,000 stores in 31 states in the U.S.

Banker Junior Tucker of Granville said shopping at Aldi is what he did in Bolivia. He has been looking forward to the grocery store opening ever since ground broke last year.

"This is the way it is set up differently from typical grocery stores," Tucker said. "It’s a bit of a shock. You won’t find that at Wal-Mart or H-E-B.

The majority of Aldi products from canned goods to paper products are Aldi brands, keeping costs down.

Women face disparity

Basketball players in some causes, perhaps, but not in others, just as Haway Griner can revitalize league

**Opinion**

Don’t separate students by majors in housing decisions

Not everyone is getting it. I’m excited for East Village to bring it all together. Although I’m not going to living there, I think East Village is going to be a game changer in terms of how people view East Village’s campus housing because it will allow them to be in a connected community housing that’s close to the other residents, more so than in the past.

This is going to be a positive thing for the neighborhood.

Each student is a little bit different, a little bit better at giving us a chance to shine and to shine in the right places. They can do the same in East Village, and I think that’s going to be a good thing for the people there.

For me, this is bringing back a little bit of the NBA greats like the NBA greats do being able to relate to the people and to be a little bit close presence to one another, and this can cause East Village to be a little bit more fun and enjoyable.

The East Village Residential College will house students in schools of Science and Health & Living Learning Communities, among the many.

These groups already are pretty cozy and can have as many students as they want. For example, science students have the TAMU science hall and rarely leave it. Engineering and computer science students have the majority of their classes in the same building and their own Living Learning Community for engineering and computer science.

What this means is that Baylor in the future is going to own all the science, technology, engineering and mathematics (STEM) students and concentrate them in one area. This means that and it will be great for those who want to interact with other students and not be too far away that sees how the basketball. It’s going to be great for those who want to work for East Village right now.

Newly want us to live to interact with other students and friends for those who want to work for East Village.

The premise of the lecture is that the arts are the "tools of the mind," and that "morals are the greatest need of humanism," Maritain wrote.

Jacobs will join the Honors College in fall 2013 and present to students and faculty "the Extrapole-Creative Arts and Excellence in Teaching" lecture series on the arts, humanities, and visual studies.

"An amazing combination of disparate concepts around the arts areas," Jacobs said. "All the arts get a beauty that you find in no other place.

When organisms make a concerted effort to be something during a certain time to dominate, he said, it becomes a competition, and the time people get on board," Jacobs said. "We have the same goal of the house, and the same goals of the time, and people will remain there some of the time, but not all of the time.

"It's an excuse to get out of the house and do something a lot of people don't do, but sometimes you don't get to do it," he said. "He said the house is about the fun and the fun you can have at the party that you have to be in good glasses, and have a good time."
Many students are finding the benefits of using apps on their iPads, especially for note-taking. The app Notability is one such tool that helps students organize and digitize their notes. Here’s a look at how the app works:

**What is Notability?**

Notability is an app that allows users to create digital notebooks and structure their notes in a way that is similar to traditional paper notes. It supports handwriting recognition, allowing users to write with a stylus or their finger, and includes features like highlighting, note-taking, and an OCR (optical character recognition) tool.

**How to Use Notability?**

1. **Create a New Notebook**
   - Open Notability and select the “Create New Notebook” option.
2. **Add Pages**
   - Tap the plus sign (+) to add a new page to your notebook.
3. **Write and Organize Notes**
   - Use the handwriting tool to write your notes. Notability supports multiple pen colors and styles for easier organization.
4. **Add Symbols and Equations**
   - Use the symbol library to add mathematical symbols, arrows, and other symbols to your notes.
5. **Annotate PDFs**
   - Import PDF documents into Notability to annotate, highlight, and add notes directly to the document.

**Pros of Using Notability**

- **Granular Control:** Users can control the display of text, symbols, and other elements.
- **Integration:** Notability can import and export content from other applications.
- **Portability:** Notes created on one device can be shared and accessed across all platforms.

**Cons of Using Notability**

- **Learning Curve:** Users may need time to get comfortable with the app’s interface and features.
- **Cost:** Notability is a paid app, which might be a drawback for some students.

**Conclusion**

Overall, Notability is a powerful tool for students who want to take their note-taking to the next level. With its advanced features and intuitive interface, it can be a valuable asset for anyone looking to improve their study habits. If you’re a student looking to optimize your note-taking process, Notability is definitely worth checking out.
Baylor women still atop AP poll

By Associated Press

Baylor remains No. 1 in the Associated Press women’s basketball poll for a fifth straight week after wrapping up the regular season by beating Texas Christian, 70-47, on Monday.

The Lady Bears had only two votes in the last poll, but they received 19 of a possible 20 from AP voters Monday and will host Kansas State on Thursday in the opening round of the Big 12 tournament.

The first six remained unchanged with Connecticut, Maryland, Stanford, Duke and California following the Lady Bears. Colorado State was the only team outside the first six that was in all three poll votes.

In the voters’ mailbag, Stephen F. Austin, moving from 14th to 12th, received five votes.

The US$2.5 million San Francisco, a U.S. nuclear-powered submarine, is docked on Friday before South Korea and U.S. patrol military exercises and a naval review in Joohan, South Korea. South Korea and South American troops began naval maneuvers as a show of force partly directed at North Korea amid signs that Pyongyang will try to conduct its third atomic test.

The region has also seen a surge in missile launches. As it issued its third statement, the nuclear envoys of South Korea and China met in Beijing.

Garza has refused to say whether it was sending any military or intelligence assets to South Korea.

The South Korean military official said, requesting anonymity because of departmental rules, that they would closely coordinate with South Korea and China to deal with any possible nuclear provocation by North Korea.
