**Two in critical care after stabbing at Cypress college campus**

**In Print**

By Jena Arinjam and Kaitlin Kennedy

A 20-year-old student went on a building-to-building stabbing attack at a Texas community college Tuesday, wounding at least 14 people — many in the face and neck — before being subdued and arrested, authorities said Tuesday.

The Harris County Sheriff’s Office said in a news release that Dylan Quick had been planning the attack at the Lone Star College System’s campus in Cypress for some time and had bought rudimentary weapons to stab to death as many people as possible.

The Harris County Sheriff’s Office said Quick was arrested at 4:00 p.m. Tuesday after a fellow student at Lone Star College-CyFair called 911 to report the stabbing.

A piece of the blade that was thought to be used was found in the area where the attack happened while the victim was being treated at a hospital.

“Quick is a young man who had a history of psychiatric problems and had expressed tendencies to self-harm,” said Deputy Sheriff Chris Pina, the department’s spokesperson.

Quick was born in 1993 and was diagnosed shortly after his birth with autism spectrum disorder and bipolar disorder.

“Quick is due in court on Thursday morning to face charges of capital murder,” said Pina.

According to the National Coalition Against Sexual Assault, at least 1 in 4 college women will be the victim of sexual assault before her academic career is over.

An alumna hopes to bring awareness to sexual assault by telling her own story of being assaulted when she was a Baylor student.

She is from San Antonio and was a part of the student body during fall semester 2008. She is now a junior at Lamar University, majoring in psychology.

Patterson is a member of the Baylor University Alumni Association and is the president of the Alumnae Association of Belize.

Rethink, refine finals

I am writing to comment on "Comprehensive finals get an F for effectiveness," an article that appeared in print on April 7. As a junior in civil engineering, I am signed up for seven classes, which means I have the opportunity to learn about many different things in my first three years of college. However, I do not find this to be the case. I have had about five or six final exams that were the highlight of my week, as if the rest of the week wasn't challenging enough. That being said, finals week highlights the unnecessary challenges in our academic system.

I believe that the comprehensive final exam at Baylor is a flawed system. For one, it is a single standardized test that is required of all students, regardless of discipline or major. This can be misleading for students who may not have had the same exposure to the subject matter, as it is designed to measure a student's knowledge of the entire course. This can be detrimental for students who may have had a previous exposure to the material due to their major or minor, while it may be a challenge for others.

Additionally, the comprehensive final exam can be stressful and time-consuming for students. The exam is typically long and requires a significant amount of preparation time. It can be especially challenging for students who have other commitments, such as work, family, or extracurricular activities. Furthermore, the exam can be a source of anxiety for students who may be struggling with certain concepts or topics.

I believe that there are better and more effective ways to assess student learning, such as portfolio assessments, case studies, and project-based assessments. These methods can provide a more nuanced understanding of student knowledge and skills. They can also be more equitable, as they take into account the diverse learning styles and backgrounds of students.

I urge the Baylor administration to consider alternative assessment methods, as they can be more effective in measuring student learning and can also reduce the stress and anxiety associated with comprehensive final exams. By doing so, we can create a more inclusive and equitable academic environment for all students.

Sincerely,

Texas executes convict for 1990 fatal shooting, rape

Circus elephant harmed in drive-by shooting in Miss.

HOPE, "China", according to the organization’s website.

 enclosure for the next chapter in the story of the Internet. He knew Google would be one of the first companies to take advantage of the new technology, and he was excited about the possibilities it offered. As the drug began taking effect, he felt a sense of joy and excitement wash over him.

Lewis, 90, acknowledged the steps, but not the killing. “If I had been there, you wouldn’t have lived,” he told New

marin, Connie Hilton, in the moments before the single shot was fired. The gunman had been attempting to steal money from her plastic bag. She was shot in the chest. The next day, he was taken to a hospital for treatment.

"If I hadn’t raped you, you wouldn’t have lived," he said. "It’s very rewarding. It’s wonderful."

The man who used his car to ram into the elephant was later arrested and charged with theft.

Circus spokeswoman Melinda Newman said the incident is under investigation.

The Waco Symphony Orchestra will be joined by guest violinist Josephine Heyde in its last concert of the season. The orchestra will perform all pieces most recorded by the Waco Symphony Orchestra at 7:30 p.m. Thursday in Waco Hall.

Heyde said she will feature at the concert Joseph Haydn’s Symphony No. 88, a 100-year-old symphony that is sprightly and melodic, and has an enormous energy.

In total, Haydn wrote more than 100 symphonies. The Waco Symphony Orchestra, under the direction of lente de Maeyer in its last concert will be joined by guest violinist Josephine Heyde, a native of Ecuador, changes into her American premiere, “Heyde said the piece is in honor of her American premiere.”

Heyde said the concert is an absolutely spectacular piece based on Russian folk songs. “It’s just a big, fat Romantic piece,” Heyde said.

Heyde also said it’s fun to do, and allows her to speak to the audience, which she noted the piece requires a lot of energy. She also said the piece is challenging.

Heyde said one of the challenges of playing violin concertos is generally getting the balance right. “So the orchestra doesn’t overpower the soloist, the orchestra, the soloist is able to keep up with the lighting speed of the violinist.”

Heyde said she can’t come up with an occasional art piece at such an extreme way to make an impression.”

Heyde said the piece forward to the concert. “I’ll have three pieces,” she said. “I’ll have a piece for the audience during the concert.

Heyde said the program will conclude with Russian composer Pyotr Tchaikovsky’s Violin Concerto, which will be played by the soloist. Also, the orchestra has a light piece to keep the concert light. There is no dress code for the performance.

Heyde will be featured at the Waco Symphony Orchestra at 7:30 p.m. Thursday in Waco Hall.

The Speight Parking Facility is available for the concert. There is no dress code for the performance.

The Baylor Bears defeated UT Arlington on Tuesday 14-4 at Baylor Ballpark. The win gives the Bears a winning record of 17-16.

Offensively, the Bears racked up 21 hits in a game and captured on the mound with 7 runs in the sixth inning to go up 21 hits as a team and capitalized off until he hit the gap out there, "Miller just kept fouling them off until he got the game over," Smith said. "It was a really good at-bat. It looks like he’s comfortable at the plate. He played good shortstop and we’ve been throwing him in bullpumps, looking for opportunities to do what we thought we would and got a good arm and he got good on the ball."

Miller earned his first run of the season when junior left fielder Grayson Potter singled to left field to score junior right fielder Tyler Oberts. Miller followed up with one hit in the third inning and senior David Garcia singled in the sixth inning. The Bears increased the lead to 16-2 after junior third baseman Logan Brown hit a sacrifice fly to score one run. Miller then singled and the Mavericks’ third baseman fouled the ball to bring in the final winning run for Baylor.

Off of Miller, the Bears were held scoreless before the Bears scored seven runs in the sixth inning to go up 14-2. The Bears scored eight runs in the inning and combined for 15 hits as a team.

Junior right-handed pitcher Josh Nicholls followed up by throwing three scoreless innings and striking out two, who then led the Bears to a winning record of 17-16.
