Fish fry, games bring campus together

By Maleesa Johnson

Staff Writer

The Fish Fry Festival comes to campus to bring five fish fries, general games and a special "Feed the Bears, Don’t Feed the Bears" rally to the University.

All students are invited to participate in activities that include inflatables, games, drawing booths and a pickle throwing event.

The fish fry will be served at 5 p.m. and will continue until it runs out.

The fried fish is hosted by the Association of Black Students, Kappa Alpha Theta, Sigma Sigma Sigma, the African Student Association and the Baylor Athletics Council.

"The purpose behind Fish Fry is to really rally all students together of different walks and cultures and to have a nice fun event," said Phoebe junior Claire Williams, president of the Association of Black Students.

Tomball senior Morgan Willis is serving up the fish fry as the event coordinator for Kappa Alpha Theta sisters and is in charge of Shara’s responsibility for the event.

"We work with other organizations: Kappa Sig, ABΦ, ASA and BAC, Willis said. "We collaborate for most of it but we focus on the council or the board wall aspect.

Kappa Sigma is hosting the "Try What You Like" contest where contestants try food, like Oreos or Ben & Jerry's, for the first time.

"The ‘Try What You Like’ contest is a chance where groups of people give four main courses a chance to see what they think will be the best fried food," Garban said.

The "Try What You Like" contest is a chance where groups of people give four main courses a chance to see what they think will be the best fried food. Garban said.

"Try what you like content by interests or categories try this kind of event, like Oreos or Ben & Jerry's, for the first time."

Pedestrians need protection at BU

Baylor student risk their lives for the sake of higher education. Not every student loses both the edge of danger, but there is a high percentage of students who do die in the daily rush.

I’m talking about the average student on campus. I need to add to this description that the pedestrian mortality rate is as low as it gets. Walking’s the safer way to get somewhere on campus, except when you are in an area of the arcade game “Three.”

Pedestrians have the “right of way.” But this does not exist on Baylor campus.

It is every man for himself! If you make it home in one piece, you have accomplished a phenomenal feat of bravery and luck.

Every day, I wake up in a cold sweat with the thought of being hit by a moped, bike, skateboard, motorcycle, car and even roller derby.

You must keep your wits about you while walking across the street.

I’m junior, and in the three years I’ve been at Baylor, I’ve been clipped by these bikes, a moped and flattened by a fresh-faced soul on a skateboard.

We are looking for volunteer contributors to submit letters to the editor. Letters should be a maximum of 250 words.

The Baylor Lariat welcomes reader viewpoints through letters to the editor and guest columns. Opinion expressed in the Lariat is not necessarily those of the Baylor administration, Abilene Baylor Board of Regents or the Student Publications Board.

Letters

Letters to the editor should include the writer’s name, major, graduation year, phone number and student identification numbers. Non-student writers should include their address. Letters that focus on those affecting students at BU or facility may be considered for a guest column at the editor’s discretion.

All submissions become the property of The Baylor Lariat. The Lariat reserves the right to edit for grammar, length and style.

Subscriptions

A subscription to the Lariat costs $45 for two semesters. Send check or money order to One Box (P.O. Box 97110), Waco, TX 76798-7110 or e-mail Lariat_sub@baylor.edu.

Baylor has been recognized as a top university by students in the fields of science, technology, engineering and mathematics.

Baylor is ranked 46 out of the top 50 U.S. schools recognized for their STEM (Science, Technology, Engineering and Mathematics) programs, according to a report by the U.S. Department of Education.

A list of the rankings is compiled from data provided by the Integrated Postsecondary Education Data System, which is managed by the U.S. Department of Education.

The list shows these ranked college and national STEM programs provided, number of female enrollment and percentage of female enrollment with these major fields.

The report indicated Baylor has 413 women enrolled in engineering programs, comprising 30 percent of the total number of Baylor STEM students.

Rachel Morley, director of Integrated Postsecondary Education Data System, is generally acknowledged.

Some students and faculty enhance national exposure by pursuing research and publications. John Johnson, president of the Alpha Delta Pi’s Tug for Tots philanthropy event.

Delta Pi, wrote in an email.

According to Johnson, “Tug for Tots is a great event that is part of our philanthropy for the Ronald McDonald House. As an Alpha Delta Pi, I want to create a fun event that is accessible for all of our members and the surrounding community.

“Tug for Tots is an event that is very fun and generates a lot of money for the Ronald McDonald House. As a philanthropy event, it is important to create an event that is enjoyable for everyone and that also helps a good cause,” Johnson said.

Every year, servers are recruited to serve as volunteers and servers and clients are able to help out.

Dr. Corey Carbonara, professor of film and digital media, received the Nat Tiffen Award for the International Cinematographers Guild.

Carbonara is one of four recipients in the awards show this year. Included among the other recipients is Julie MacRae, whose first film was “Home Alone.”

“To be on the plane to Paris with some of the most esteemed gentlemen in the field of cinematography is a surreal moment,” Carbonara said. “It was an honor, an award in and of itself, to receive this award alongside other men who have done great things in the field of cinematography is a blessing.

The guild is made up of a large group of members who work in the film and television industry, including directors of photography, camera operators, director of photography, camera operators, and all members of camera crews across the nation.

During his 30 years at Baylor, Carbonara has curated various events during his career, including one for his important role in developing the first high-definition television.

“From the very beginning,” Carbonara said. “I really don't feel that it's as much of an award for me as it is a reflection of the program here at Baylor. We have so many students that come out of our department that we are so proud of. Teach- ers are only as good as the stud- ents they produce.”

**Orchestra prepares for semester shows**

**Arts & Entertainment**

Wednesday | October 2, 2013

By Anna Hayes Intern

“T's a new semester and that means a new season for the nationally recognized Baylor Symphony Orchestra.

Maestro Stephen Heyde, director of orchestral activities and conductor-in-residence, will direct the Baylor Symphony in its first performance of the season at 7:30 p.m. Tuesday in Jones Concert Hall.

The concert, which is free and open to the public, will feature a piece by Richard Strauss called “As It Is in Heaven,” translated, “Ein Heldenleben.” The piece features an orchestra in action and takes the listener through the life of the hero.

“It's somewhat of a mega-

piece,” Heyde said. “One of the great themes of the Romantic period is the artist as the hero.

Heyde said the idea of self

and others led Strauss to com-

pose the work in the same key as Beethoven’s “Eroica.”

Strauss wrote the piece in an at-

tempt to show that he was a better

than Beethoven, Heyde said.

He was eventually dissuaded

from this idea of self-

opinion, but what he made was a monumental piece,” Heyde said.

“T’s possibly the only piece that I think every student should hear because it’s so dynamic,” Heyde said.

“This year, the symphony will be performing its first concert at 7:30 p.m. Tuesday in Jones Concert Hall.

“By the Strauss piece, I believe that it's as much of an award for me as it is a reflection of the program here at Baylor. We have so many students that come out of our department that we are so proud of. Teachers are only as good as the students they produce.”

When you watch a Baylor football game, you’re supposed to ignore the incredible size of the offensive line. The offense has posted huge numbers, averaging 68.7 points per game on the season. The offense behind the success is the offensive line. Former Baylor football player Robert Robinson has been created by an offensive line that has been creating the “best in America” by head coach Art Briles and is a cornerstone of the team.
