BU men strut to raise money for breast cancer

Dr. Antonio Jeter
Reporter

Baylor fraternity members are about to walk down the catwalk for breast cancer awareness. The Baylor sorority Zeta Tau Alpha will host Big Man on Campus at 7 p.m. Wednesday in the Barfield Drawing Room of the Bill Daniel Student Center. The event will include a pageant with participants made up of members in different Baylor fraternal organizations, all while raising awareness of breast cancer, the philanthropic cause of Zeta Tau Alpha. The money that is raised from the event will go toward the Zeta Tau Alpha Foundation, which benefits breast cancer awareness and education.

“The pageant will have four rounds, with each round incorporating a sign of support for breast cancer awareness,” said Scottsdale, Ariz., senior Lauren Crofford, a fundraiser chairwoman for Zeta Tau Alpha.

Participants will compete in a yoga eating contest, where the lady of the group will go to the Yeibo “Sure Lids to Sure Cans” campaign. For every pound that is saved, ‘Yeibo’ will give 30 cents to breast cancer research and funding. There will also be a wear and non-wear round, where participants answer interview questions and get extra points for incorporating pink into their outfits. Pink Out will be another round, where participants have to come up with pick-up lines and get points by mentioning breast cancer awareness.

“We are going to have actual breast cancer survivors be judges of the four rounds,” Crofford said. “We’ll have all types of participation and it’s going to be a lot of fun.”

While the goal of the event is to raise awareness of breast cancer, fraternity members have the chance to win prizes by participating. The first-place winner will get a crown and sash and a $100 Visa gift card, said San Antonio junior Kelsey Mann, director of philanthropy for Zeta Tau Alpha.

“Men can get breast cancer, although the ratio between women and men is 100:1, ”Jenn said. “There are approximately 2,400 men diagnosed with breast cancer each year. Men can also do self-checks and just be aware that it is possible.”

Another myth is that women in college cannot get breast cancer. Other young people are thought of as invincible, Jenn said. “From here a woman who was diagnosed sophomore year of college with breast cancer. It was a very rare form of her daughter, and it was a very aggressive form of cancer. She fought it for 11 years before a breakdown.”

“People have different lifestyles and it is a lot worse for breast cancer in women,” Mann said. “Breast cancer is a lot worse.”

While the goal of helping those students pick secondary major or minor. One purpose of the fair is to give students the opportunity to speak with professors and other Baylor employees to figure out how to get a job and how much are thought of as invincible, Jenn said. “From here a woman who was diagnosed sophomore year of college with breast cancer. It was a very rare form of her daughter, and it was a very aggressive form of cancer. She fought it for 11 years before a breakdown.”

“There have been studies looking at this and microwaves and neither has shown any increased incidence. Breast cancer — like all cancers — results from abnormal cells which are not corrected and continue to grow and become more abnormal over time,” Mann said.

“Men can get breast cancer, although the ratio between women and men is 100:1. ”

“There have been studies looking at this and microwaves and neither has shown any increased incidence. Breast cancer — like all cancers — results from abnormal cells which are not corrected and continue to grow and become more abnormal over time,” Mann said.

“If cell phones don’t cause cancer and...
Debt bill good becoming another pawn in political game

Another round of political posturing is underway, and the nation is feeling the ominous undertones from the fiscal future of our nation. Despite the government’s attempt to keep the debt from exceeding the limit, the budgetary crux will just wait until the next round of financing. This is the last resort, the debt limit being another pawn in political game.

Drugs-induced, will only be administered by women. According to the admitting privileges, the law will have to close many of the abortion providers, action of the clinic. This would include the clinics in the east. The providers claim the law is actually detrimental to the abortion and women's health.

The only way it could be detrimental to women's health is if a woman aborts her pregnancy due to the law. In reality, the law is a step in the right direction for the case of women's health. Planned Parenthood is a business with its clients receive abortion services. Should the law take effect, there will be no more Planned Parenthood open, they should be geared towards providing services.

The debt limit is becoming another pawn in political game.

Letters to the editor

Letters to the editor should include the writer’s name, hometown, major, graduation year and phone number. Non-student writers should include their address.

Please try to limit your responses to 300 words. Once submitted, each letter is given a headline that is intended to capture the main point of the letter and is in no way intended as a statement of fact.

Letters that focus on an issue affecting students or faculty may be considered for a guest column at the editor's discretion. All submissions become the property of The Baylor Lariat.

The Bears cruise in Big 12 opener over WVU

By Daniel Hill

Tuesday | October 8, 2013

The Bears have yet to play a game on the road this season after four consecutive games in the state of Texas. It’s time to go on the road again.

“It’s totally different,” senior defensive end Ahmad Dixon said. “Everybody except for the players is used to playing the same uni as you. That’s something that they’re used to getting ready for, and we have to get our guys ready to understand. We just have to go out there and focus and play Baylor football.”

The Bears upset No. 12-ranked Kansas State in Manhattan in the first game of the season, and this week they travel to play No. 15-ranked West Virginia in Morgantown.

“You can say we are trying to get the younger guys that are wearing the same uni one’s against you except for the safeties Ahmad Dixon said. “Every single guy knows they are against us. It’s not like a home game.”

The Bears offense dominated the Big 12-ranked No. 1 Kansas State Wildcats in Manhattan. This week that will change, as Dixon said the Bears need to be emotionally flexible. When we go on the road, we just have to keep playing the same way that we have been,” Dixon said.

The Bears know staying mentally tough is the key to victory against WVU.

“You just have to treat it the same way you treat a home game,” said senior linebacker Eddie Lackey. “You know you are going to get criticism from the fans. It’s just another one of those things where you have to be emotionally flexible. When we go out there, we just have to keep playing the same way that we have been,” Lackey said.

The Bears rank 37th in the nation with 10 takeaways and seven turnovers. "We think we have an explosive offense to us from an offensive standpoint,” Briles said. “I think defensively, we have some guys that play with a lot of intensity and toughness. Write a tough football team and that’s something that we pride ourselves on.”

With a road test awaiting them, the Bears know starting mentally sharp is the key to victory against Kansas State.

The Bears average margin of victory through four games is over 29 points in the first quarter and 41 points in the first half. Both of those marks are accurate for more than 60 percent of all games through four quarters.

“If we can win the first half of the game, play with a lot of intensity and toughness. We’re a tough football team and that’s something we pride ourselves on. "

The Bears rank 37th in the nation with 10 takeaways and seven turnovers. “You just have to treat it the same way you treat a home game,” said senior linebacker Eddie Lackey. “You know you are going to get criticism from the fans. It’s just another one of those things where you have to be emotionally flexible. When we go out there, we just have to keep playing the same way that we have been," Lackey said.

The Bears rank 37th in the nation with 10 takeaways and seven turnovers. "We think we have an explosive offense to us from an offensive standpoint,” Briles said. “I think defensively, we have some guys that play with a lot of intensity and toughness. Write a tough football team and that’s something that we pride ourselves on.”

With a road test awaiting them, the Bears know starting mentally sharp is the key to victory against Kansas State.

There are risk factors that cannot be changed and risk factors that can be changed, according to the National Breast Cancer Foundation Inc. The factors that cannot be changed include age, family history, early menopause, late menopause. Factors that can be changed include regular exercise, weight loss, alcohol consumption and hormone replacement therapy.

Researchers at the Department of Cancer and Professional Development, will also be in attendance to aid students who want information or assistance regarding internships, researcher or the job market.

"This is essentially an online database that contains job postings, internship information, part-time job information and employer information," said Kat Driver, a career adviser at Baylor.

It also contains information from all Baylor Career events, including workshops, employer presentations and career fairs, as well as scheduling information regarding many different companies on campus interviews that occur throughout the fall and spring semesters each year.

All Baylor students have a Hire A Bear account, and simply have to log onto their website and activate the account to access all the information and tools the interface has to offer, including a new feature this year that helps students create resumes.

In addition, a student’s access to Hire A Bear does not necessarily end after their time at Baylor. Alumni also have access to the database after graduation for no charge, and while many of the potential employers on the website are simply national companies looking for people to fill positions, many Baylor alumni also use the website as employers looking for fellow Bears to hire, many Baylor alumni also use the system as employers looking for fellow Bears to hire, many Baylor alumni also use the system as employers looking for fellow Bears to hire.

"Above anything else, this is for the students," Driver said.

"The system is there as an extra resource for both students and alumni."

"The goal of the Majors Fair is to give students a chance to speak face to face with professors in an informal setting, something Weaver described as less intimidating compared to the typical procedures of setting up a formal meeting with advisors.

The fair could potentially help those who are undecided.

"This isn’t just for undergraduates," Weaver said. "Help and advice will also be offered to those students who may have already picked a major and starting taking the courses, but for whichever reason, have realized they want to switch."
