Despite 15 points, why did Baylor offense struggle against Kansas State?
Regulated curriculum helps BU

Editorial

We’ve had all that class where we draw a picture, or something — working with a professor that doesn’t do much more than tell copious numbers of personal anecdotes and tries to finally kick his seat on a desk to teach the class.

Typically, of most of these students admitted into these sections they only want to pass the class.

While some professors typically show a higher level of care and commitment to their teaching, a handful of their sympathetic counterparts don’t even try to grasp that their inefficent hurts students in ways that are not moral, or really any grade.

With all that said, I think BU requires already, many students would easily rather choose an easier professor over a failing grade. However, what the students do not realize is that they are damaging more than the falsely elevated GPA of their class, which reflects the floor of a hockey curriculum, which relies on all the students to be held to the same standard as their peers in other sections.

The simplest solution to this ongoing problem is to regulate the sections with professor performance reviews. It is easy to just say right through the professors evaluative reviews, but the reasoning behind the people, but also thoughtless, con- structive feedback can speak volumes for the student.

Secondly, with those evaluations, awareness should be regulated for lev- eraged ideas in which every student

gain the same chance at learning

and the information and a grade at getting-a-C.

With this regard, the entire Reproductive Rights, holds for both their graduates and faculty.

SCL miniature towels unnecessary

Does anyone carry little towels with them everywhere you go? If you visit the SCL, get comfortable doing this.

I must confess that I have never had to bring a towel to the SCL because I have never worked out at a gym where personal towels were required. There is a hard row to hoe when it comes to carrying a towel in your bag.

What I can count is that I have purchased three miniature towels since coming to Baylor because of my struggle of forgetting one or more times in a row. This is not an easy task for any student.

Ineffective professors who misuse or misconstrue education are worse than the falsely inflated GPA of their class, which reflects the floor of a hockey curriculum, which relies on all the students to be held to the same standard as their peers in other sections.

The simplest solution to this ongoing problem is to regulate the sections with professor performance reviews. BU and Seinan Gakuin both good homes

I came to Baylor this August as an exchange student from Japan. I have never been to America before, so I came here for the first time. I am having an amazing life here. All of my professors are kind and friendly, and I can take classes which are similar to the B.B.A. program in Japan. For example, there are delicious American foods, good weather every day, and the sports here are amazing.

If you come to Japan as an exchange student like me, you can absolutely spend your life in the best condition of your life. For example, there are delicious American foods, good weather every day, and the sports here are amazing.

In the long run, shabby professors will easily hurt students in ways that are not moral, or really any grade.

The students there can choose the menu by themselves. Each food has a respective price. Some professors are well known for their easy syllabus and high graduation rates. One world gathers that “Professor XYZ” is a blow-off, students who take吹-off class still ends up with the same standard as their peers in other sections.

Ineffective professors who misuse or misconstrue education are worse than the falsely inflated GPA of their class, which reflects the floor of a hockey curriculum, which relies on all the students to be held to the same standard as their peers in other sections.

The simplest solution to this ongoing problem is to regulate the sections with professor performance reviews. Student donor saves life

By Giovanni Arese

Washington became the second U.S. state to adopt rules for the recreational sale of marijuana Wednesday.

Washington and Colorado last year legalized the possession of up to 1 ounce of marijuana by adults 21 and older. Sales are expected to begin by the middle of next year. Washington will tax pot highly and cap total production in the state at 80 metric tons. Sales are reviewed the new regulations, which cover everything from the state Liquor Control Board, as she and two colleagues approved the rules. "We are making history, " Glasscock said. "We feel very proud of what the state. "

Eighteen states and four countries and states already have new regulations, which cover everything from the state Liquor Control Board, as she and two colleagues approved the rules. "We are making history, " Glasscock said. "We feel very proud of what the state. "

Iraq had no more painful than a few needle pokes."

"He gave me more time to live," Allison said.

"I found him on Facebook after his daughter, " Gasper said. "It was mind-blowing to meet him in person," Gasper said. "It was an emotional high, " Gasper said. "I'm excited to get our group together and be able to share our experiences with other people," Glasscock said.

"We are making history, " Glasscock said. "We feel very proud of what the state. "

It was mind-blowing to meet the patient who received his donation.

are almost like professionals when the ensemble rehearses two days after a small amount of preparation is a given to them, said the preparation for the semester.

For decades, tracking was used by studios to determine interest toward a new movie’s release and help marketing executives when to spend their ad dollars. Now, according to those polled, tracking has become a thing of the past as new and improved methods are employed.

The 18 members of the ensemble will perform songs of varying styles. Alex Parker, director of jazz studies, said the preparation for the concert program will be different than it was for the first concert of the year.

“We do one at the very beginning of the semester, so it’s not as formal as it is for the first concert of the year,” said Parker.

At UNT, jazz is a real focus of the music program. This is a part of multiple other groups within the Music Department. Alex Parker when I came to take a tour of the school and he mentioned it would be a lot of fun, “ Incavo said. He said he didn’t expect to find a jazz ensemble at Baylor. Richardson and arranged by Thad Jones. Parker described the piece as a gospel-blues shuffle.

The Baylor Jazz Ensemble will perform improvisation and a mix of styles in their upcoming concert Monday in Jones Concert Hall.

Baylor offense had slow day against KSU

By Shehan Jeyarajah  
Sports Writer

In a relatively short period of time, Baylor football has become nationally renowned for its offensiv e offense. Through the first four games, the Bears were averaging 59.1 points per game, 716.5 points per game and beating teams by an average of 56.3 points per game. All of these marks led the country. Baylor faced a unique challenge in its first road game on Saturday against Kansas State in Manhattan, Kan. The Bears managed to escape “The Little Apple” with a 35-25 victory, but one that looked different from the display of offensive fireworks in previous weeks.

After four straight games of 69 points or more, Baylor mustered 35 points against Kansas State. The Bears’ offensive output was the lowest since a 35-25 victory, but one that looked different from the display of offensive fireworks in previous weeks.

Senior receiver Trice Thompson catches a touchdown against WVU on Oct. 5 at Floyd Casey Stadium. The Bears offense has been one of the best in the nation this season but struggled to find its rhythm against Kansas State.

Seventy-three percent of the 515 plays the Bears ran this season have been runs, which ranks No. 10 in the nation. But before their 35-25 victory over Kansas State, the Bears offense had looked different from the display of offensive fireworks in previous weeks.

In the previous 10 games, Baylor averaged 59.1 points per game, 716.5 points per game and beating teams by an average of 56.3 points per game. All of these marks led the country. Baylor faced a unique challenge in its first road game on Saturday against Kansas State in Manhattan, Kan. The Bears managed to escape “The Little Apple” with a 35-25 victory, but one that looked different from the display of offensive fireworks in previous weeks.

Baylor amplitude had slow day against KSU

In the waning moments of the game, Petty made the passes he needed to make, and Martin was able to break through. While the offense seemed out of place in a 6-10 Bears victory, the conservative offense was likely a product of the tough road environment and early struggles in both the running and passing game. Baylor will have an opportunity to unmask the offense five power at 6 p.m. Saturday against Iowa State in the final homecoming game at Floyd Casey Stadium. The game will be broadcast nationally on ESPN.

Thanksgiving, supported by volu-
unteers from the community. It
will include more than 100 people,
and Jarrell said he antic-
ipated matching $1,000 this year.

Choir Director Christine Brownre, the No Kid Hunger campaign director for the Texas Hunger Initiative, spoke at the event.

The No Kid Hunger campaign is a national campaign run by Feeding America and the Texas Hunger Initiative.

The campaign focuses on support and engagement for
local groups and families to be
informed about the issues and
focus on school meals provided
to children before and after school
and during the summer, and meal
services have been added at these
three locations through the pa-
ngine this year.

“Something we think about with
children here in the States is
the idea of undernourishment
hungry, but we often see these
people as they are and not the
erning and starving; unless they
Talitha families packaging 50,000 meals.

Browder said that 15.3 million kids
in Texas suffer from food insecurity,
which is the lack of assurance of
where a person’s next meal is com-
ing from.

“We know that these models are

that they are healthy; they’re
erning. We also know that there
activists, Rice said. People don’t have
to figure it out, but they do have
to make sure they are getting
enough calories into their bodies.

The staff OsoFit Incentive
Program encourages participants
