Baylor Magazine to continue publishing despite controversy

By Ray Tweetman

Members of the Baylor Alumni Asso-
ciation can expect to see the Baylor Line get back on the press by the next issue. The line was last published in January, 2014 before the associa-
tion voted to publish the Baylor Line, although the name of the publication has not been changed to eliminate the use of “Baylor.” A part of BAA tradition since the first publication in October, 1946, the magazine will be published quarterly, according to the Baylor Line website.

The winter 2014 issue of the Baylor Line was originally scheduled for publication in February. An email sent to BAA members on February 4th by Lori Fogleman, assistant vice president for media communications at Baylor, said university officials have yet to see the suit.

“This accident is a terrible tragedy,” she said. “But we have not sunk the lawsuit, so we’ve had the opportunity to review it. Our family counsel is also waiting to see it.”

Over the years, this university education system has undergone changes to become fairer. The lat- est is that SAT scores reflect life experiences but not just the mark.

Trey Gregory, president of the College Board, announced on June 30 that 7 changes would be made to the SAT to make the test fairer for students. Among these changes is a major alteration in the way scores are reported to test takers starting in the spring of 2016.

The original essay question will be changed to ask test takers to jump to the SAT score from a 800-point scale to a 2400-point scale. New to the test will be back- down to a 800-point scale with an additional essay question: the writing and reading” sections of the test will come in two parts. Students will control separately. Students will only take the optional essay section, so test takers will be given a prompt that they must analyze the argument of another writer. The changes to the essay itself are considerable because it will make the essay box less intimidating, so I want to make it easier for people to understand what we’re asking on the test.

We often feel compelled to donate to a cause in which we have a personal interest, the writer says. We want to lend a hand where we can as often as possible. But how do we know if a charity or potential donor can see that our passion, charity or not? If we want to be sure that we’re giving to the right organization, we have to be sure that they are using our money effectively.

Forbes especially says that the Socially Responsible Investment (SRI) model, which allows for the investor to do good and profit at the same time, is the future of investing. It is the right thing to do, it is profitable, and it allows one to do good and have a financial return.

But how do we know if a charity or organization is effective or not? There are many different ways to approach this question, but perhaps the most straightforward way to determine the effectiveness of a charity is to look at their financial statements.

The financial statements of a charity should include the following:

1. The organization’s mission statement
2. The organization’s financial statements, including its balance sheet and income statement
3. The organization’s program notes, which describe the organization’s programs and services
4. The organization’s audited financial statements
5. The organization’s independent auditors’ report

The financial statements should also include the following:

1. The organization’s tax-exempt status
2. The organization’s tax return, which is filed with the Internal Revenue Service
3. The organization’s annual report

The financial statements should also include the following:

1. The organization’s program notes, which describe the organization’s programs and services
2. The organization’s audited financial statements
3. The organization’s independent auditors’ report

These financial statements should be reviewed by an independent auditor.

The organization’s financial statements should also include the following:

1. The organization’s program notes, which describe the organization’s programs and services
2. The organization’s audited financial statements
3. The organization’s independent auditors’ report

“Big data in a shrinking world” is the theme for the eighth annual Global Business Forum.

Baylor alumnus Mark Hurd, president and board member of Oracle, will be the keynote speaker on Wednesday. Hurd oversees the strategy for the company’s, global field operations. Oracle is a computer hardware and software technology company that is known for database management systems.

The forum kicked off Monday with a film titled “The Age of Big Data.” The Baylor Business McBride Center for International Business will have speakers, a student competition and other events throughout the entire week on the fifth floor of Cashion Academic Center, unless otherwise noted on the official schedule for the forum.

Big data is the concept of structured and unstructured data growing at an exponential rate. Everything from an internet search to a blog posting leaves a footprint of data for companies to collect and analyze. Big data allows for evidence-based decision making.

We are generating a lot of information, and it’s being recorded in various ways, and now we have the ability to store it all, and make it easily accessible anywhere by vastly increasing storage capacity,” said Dr. Steve Gardner, director of the McBride Center for International Business.

Gardner said the theme of the forum was chosen a year ago, and Baylor students in particular should become more familiar with the trend because of the careers available. Careers involving big data include computer scientists and statisticians, but big data affects everyone.

“Data science and big data, the job opportunities in the labor force are enormous right now,” Gardner said. “There’s a huge shortage of the skills that are needed by employees in the private sector, nonprofit organizations, the government, everywhere.”

This year, the forum will have 12 business professionals. Some of the topics include crowdsourcing, social media, legal and ethical concerns and consumer supply and demand.

Gardner said events during the forum occur in the same increments as the class schedule. To counter this, students can go to presentations between classes on Thursday on the fifth floor of Cashion Academic Center from 9:30 a.m. to 4:45 p.m.

“Some faculty members will give extra credit for students for attending these and we certainly encourage that because we think it’s a good thing for students to be able to take advantage of the opportunity,” Gardner said. “We don’t have these types of people on campus all the time.”

The forum ends Friday with the “Global Issues Challenge” student competition. The annual competition has students pitch their position with public speaking and knowledge on big data. The winner will receive a $100 Amazon gift card.

A bystander and a police officer tend to a man who was struck by a vehicle on Red River Street in downtown Austin at South by Southwest on Wednesday. Sandy Thay, the third crash victim, died Monday from injuries sustained when she was run over outside The Mohawk music club.

**Third person dies from SXSW crash**

**Associated Press**

AUSTIN — A third person struck by a suspected drunken driver in Austin last week during the South By Southwest festival died Monday, police said.

Sandy Thay, 26, died from the injuries she sustained when she was run over outside The Mohawk music club early Thursday, Austin police spokesman Veneza Bremner said. Police say the driver, Rashad Owens, 21, has been charged with capital murder and aggravated assault with a motor vehicle. He's accused of driving drunk and fleeing from police, then intentionally driving into the festivalgoers. The aspiring rapper from Killeen has been jailed on $3 million bond, and prosecutors are seeking an additional charge against him from a grand jury.

The South By Southwest festival attracts more than 200,000 people to Austin for a technology conference, film festival and thousands of music performances.

**Tina Fey shuts down ‘Mean Girls’ film rumors**

**By Nardine Saad**

Los Angeles Times

Tina Fey is working on a “Mean Girls” reunion of some sort, but sadly it won’t be in the form of another movie.

The 2004 comedy, which will celebrate its 15-year anniversary in April, was adapted by Fey from Ross Wimsatt’s 2002 book “Queen Bee: Rivals, Gossip, Boyfriends, and Other Realities of Adolescence.”

The cult classic starred a pre-rehab Lindsay Lohan, now 30, “The Office” Rachel McAdams, now 35, and the troops of “Back to the Future” — pre-“Veronica Mars” Amanda Crew, “Key and Peele” and “Party of Five” Lauren Graham.

Doing the press rounds for her latest comedy, “Muppets Most Wanted,” Fey addressed the rumors and her role in starting them.

“Yeah, I saw that at the first episode of the ‘Tonight Show’... We did that bit with Jimmy, and I said to her, ‘Oh, I think someone may call us about doing some kind of reunion because next month is the 15th anniversary of the movie,'” Fey told Access Hollywood.

“The ‘Saturday Night Live’ alum said that, realistically, the get-together would just be a panel discussion of some sort, not another movie.

Bears ousted by ISU

By Shehan Jeyarajah
Seniors Washer

Baylor entered the Big 12 Tournament as a seven seed, but with six minutes left in the championship game, the Bears looked ready to pull within five with 2:34 remaining. Texas improved its shooting to 54.4 percent from the floor in the first half, but could not close out the Sooners, who held seven points at the end of the first half. Senior guard Brady Heslip and forward Mark Vital combined for 26 points in the second half. Baylor shot 45.2 percent from the field in the first half, while Oklahoma shot 30.1 percent from the field. The Bears went on to win 74-65.

The Bears defeated Texas in the second game, 61-49. The Bears looked ready to win the Big 12 Conference championship, but lost to the Sooners, 69-63. The Sooners shot 32.7 percent from the field for the game, and held the Bears to only nine field goals. The Sooners led by double-digits in the first half, but could not pull away. Long hit a three-pointer to tie the game at 76-76. With 3:33 left and Heslip hit for three seconds left to give Iowa State a 2-point lead heading into halftime. The Bears lost to the Sooners 77-67.

The Beavers shot 32.7 percent from the field in the first half, but could not pull away. The Bears shot 30.1 percent from the field in the second half, but could not pull away. The Bears shot 21 percent from the field in the first half, but could not pull away. Long hit a three-pointer to tie the game at 76-76. With 3:33 left and Heslip hit for three seconds left to give Iowa State a 2-point lead heading into halftime. The Bears lost to the Sooners 77-67.
