Panelists speak on religion, journalism

Burchett, the panelists for the forum called This Matters, which according to its Twitter is “a series of dialogues connecting people for more than their religious affiliation.” Offering a theological view, Stroope said he believes religious engagement and communication is a great solvent for misconstruing. “Rather than talk about human rights or human dignity, which are important topics, I think we have to talk about the fact that every person, from my perspective, is created in the image of God,” he said.

“Religious affiliation,” Getterman said he believes the only way to know the wholeness of a person is created in the image of God. “There is a greater solvent for misunderstanding,” Getterman said.

Baylor veterans deserve early registration

It’s that day of the year again to register for next semester’s classes. Many students find registering for classes frustrating for numerous reasons, and I do think there is a solution that could make everybody happier.

However, as a veteran, I have found it especially frustrating to register at Baylor. I also believe there is a simple solution that would cut down on the aggravation process for the rest of campus. Give veterans registration privileges to this small demographic.

So, then, why should veterans get early registration?

It’s November, which means, “Try to get into class.” Many veteran students take classes required to fulfill their military credits. It is necessary to enroll in the classes that are needed to transfer to the university. The main reason to attend Baylor is to graduate and this is something that many veterans need to do in order to make what they sacrificed count.

That being said, you can see why early registration is so important. As a veteran, I have found that trying to get into classes is like Katrina trying to get into college in the southern area. It is something that we have to do in order to complete our education. The only way that we can do this is to have early registration.

So, then, why should veterans get early registration?

Editorial –

This day of counting noses, literally, formed from behind the wheel as almost everyone in Am- anto, and the rest of Texas were too busy to follow suit. San Antonio City Council vot- ed unanimously Nov. 6 to adopt a hand-free ordinance to limit driver cell phone use. Drivers will still be allowed to dial and answer calls, but only while parked or using a hands-free device. The city already prohibits drivers from se- nging phones for anything other than taking

New student group raises funds, awareness for pediatric cancers

By Abigail Loop

A new student organization plans to bring funds and awareness to pediatric cancers.

The Baylor Lariat

From the K-12 level to the university, childhood cancer continues to be a cause that garners attention. This spring, a new student organization plans to bring funds and awareness to pediatric cancers.

Jennifer Williams, philanthropy coordinator at McLane Children’s Hospital, said she is glad to see student passion about the cause and hopes that this will create a snowball effect on campus.

“These students should realize that every dollar counts and that sick and injured kids of Central Texas depend on them to help provide cutting-edge equipment, programs and research,” Williams said. “Students are an important part of philanthropy because their generation is full of leaders.”

According to the American Childhood Cancer Organization, each year in the U.S. there are approximately 13,400 children between the ages of 0 and 19 years who are diagnosed with cancer.

Appikatla said For The Kids is different from other organizations because their target side of pediatric cancer is cancer research aspect of pediatric cancer.

“Kids is focused more on the research side of pediatric cancer,” he said. “We want to help those who are fighting against cancer and also believe that it’s crucial a size fund.”

Next semester, members of For The Kids will put on a dance marathon to raise money for their two chosen organizations.

Students interested in learning more about For The Kids can contact Appikatla at Franka.Appikatla@baylor.edu.

Arlington senior mixes love for sharing Gospel, entrepreneurship

By Elly Spencer

Arlington senior Alexandra Morales makes handcrafted products, including headbands and hair ties, to support a nonprofit organization called Grace House. Morales has also used her products to fund a mission trip to Africa.

Monroe letter collection makes its way to auction

By Jesse House

Auction owner Darren Julien estimates the pieces could fetch $1 million or more, noting a watercolor Monroe painted and planned to give to President John Kennedy went for $80,800 at an auction ten years ago.

“I feel fortunate to see how loved she was,” Nolan said. “Like you thought she was vulnerable and not loved and she craved love and she needed that reassurance. But she had it. She had it with Joe DiMaggio, she had it with Arthur Miller.”
Baylor upends TCU 3-1

Baylor Bear

Rank No. 4 in the Associated Press preseason poll and projected to finish sec- ond in the Big 12 conference this year. The Bears carry momentum from last season's success. The loss of All-American middle hitter Julieta Soegaard will be a challenge for head coach Kim Mulkey's flexibility, but the Bears return these starters from the 2013-14 season. The Bears shined early in the fourth set to take the set 25-21 and the match 3-1.

Iowa State Cyclones

The Cyclones return 15 starters from the 2013-14 season that have appeared in the last eight NCAA championships. Since 1995-96, ISU has made more false-positives than any other team in the NCAA. Junior Kimbra Bla- klovey and senior Brynn Williamson pointed 12 of the team's 20-point in the Cyclones' two-pressure defense game. Kelsi Baker returns from an injury that kept her out of the conference last season. She will be the school's youngest res- tore her right knee in 1977-78 when the Wildcats take the court for the Big 12 conference season. Three seniors, three juniors and six sophomores return for Kansas State, adding two fresh- men to the mix this year.

Texas A&M transfer, will make her Okla- honda debut. Little was named Big 12 Pre - season Player of the Year. The Sooners also feature a younger roster for the 2014-15 season. Enemkpali and freshman Raegan Pebley have added to the Lady Bears in conference last season, bringing the team's total to 14 returning players last season. Seven players return to the floor, including senior Imani McGee-Stafford, who averaged 15.2 points per game last season. McGee-Stafford was named to the Big 12 Preseason All-Conference team last season. The team that won a share of the Big 12 regu- lar season title. Junior guard Bria Holmes, who was recently named the Big 12 Preseason Player of the Year.

West Virginia Mountaineers

The Mountaineers give the Lady Bears a run for their money last season, most likely any other team in the Big 12. WVU returns three starters from last season's team that won a share of the Big 12 regular season title. Junior guard Brianna Butler, averaging 15.2 points per game last season, was recently named the Big 12 Preseason Player of the Year.
