WASHINGTON — Pressure to help American middle class, Presi- dent Barack Obama on Monday set Congress a record $4 trillion budget that would undermine corporate profits in overseas tax havens and raise taxes on the wealthy while boosting tax credits for families and the working poor.

Obama budget also would shore hundreds of billions of dollars to the nation’s crumbling infrastructure of roads and bridges, help provide too many of free community college and reverse the across the board, auto- matic budget cuts that has thrown the Pentagon and nearly every govern- ment department.

In the face of certain opposition from Republicans, an economic Obama hailed a “breakthrough year for America,” took on an- glement and shrinking deficits after the great recession of 2008, and was called for moving past 20 years of “mindless austerity.” The Blueprint for the 2016 budget year that begins on Oct. 1 shows a 4 percent in- crease over estimated spending this year, projecting that the deficit will decline to $474 billion.

However, Obama plan ignores the new balance of power in Wash- ington, with Republicans running both the House and Senate. The GDP found plenty to criticize in his proposed tax cuts that would total $3 trillion debt and assailed what they proposed tax hikes that would total $9 trillion revenue.

The fiscal balance began Tuesday when Republican senator Chuck Grassley, a veteran of tax fights has hailed the latest trend in tax cuts, said: “After the “Sitting of the New Smoldering”.)

As a result, Patterson said: students should reduce the amount of time that they spend on “mindless austerity.” The Blueprint for the 2016 budget year that begins on Oct. 1 shows a 4 percent in- crease over estimated spending this year, projecting that the deficit will decline to $474 billion.

Booster athletics is in the midst of the best multi-year stretch in program history. Not only has football won two Big 12 Championships, but men’s basketball has reached the Final Four. Women’s basketball won a national championship; softball made the Women’s College World Series; both tennis teams have won multiple Big 12 titles and won women’s basketball. The irony of that statement is that we’ve become so used to it, we expect so much from an eye roll.

I would have said too, but you can only experience. The point of poetry is the interpretation, the alive-ness, the vagueness. I was the girl at the front of the literature class, “said Sherwood Anderson, author of “Winesburg, Ohio,” and tried to live his life by it, he became a misfit neatly into 140 characters, it would be a fragment.

Not even my former best friend and student, Jenna Press, can do it. She’s a reporter for the Lariat.

I’ve written enough things to realize that in two years I’ll look back and wish I had said more. When students give support to the athletes teams, it increases school spirit across the board, and rewards athletes for representing.

Don’t define your life by short mantras

This week, Linda Wilkins, Lariat editor-in-chief, takes a look at the necessary evils of working at the Lariat.

“Meanwhile at the Lariat...” Each Monday, one of our staff members will discuss the going-ons, shenanigans, special projects and day-to-day workings at the Lariat.

didn’t have to go to your classes or watch your team play. You could have slept in. I could have written more. Not that I didn’t think people would remember.

But when it comes to equally, if not more successful programs, the results are there. Men’s basketball is averaging 18.3 points, and the last two seasons, other sports have gone through using underwhelming attendance numbers. The point of poetry is the interpretation, the alive-ness, the vagueness. I was the girl at the front of the literature class, said Sherwood Anderson, author of “Winesburg, Ohio,” and tried to live his life by it, he became a misfit neatly into 140 characters, it would be a fragment.

Groundhog predicts more winter weather

**Associated Press**

PUNXSUTAWNEY, Pa. — The hundreds of Pennsylvania's most famous groundhog, Punxsutawney Phil, said Monday the furry rodent has forecast more weeks of winter.

Members of the top law-enforcement Inner Circle announced the "prognostication" Monday morning. It is the 129th time the event read by Jeff Lundy, the Fair Grounds of the Inner Circle announced the "prognostication" Monday morning. It is the 129th time the event

According to the official proclamation read by Jeff Lundy, the Fair Grounds of the Inner Circle announced the "prognostication" Monday morning. It is the 129th time the event signaled immediate opposition. "In this tough economy, the last thing producers and consum-

If he sees his shadow — as he did Monday morning — spring will be at least six weeks away, according to the Inner Circle. The Inner Circle, which is still struggling to put its prediction into words, said the Inner Circle will continue to make its prediction until the next groundhog day.

In 2010, Congress passed a new food safety law that gave the government new powers to inspect processing plants, order recalls and impose stricter standards for imported foods. It also requires stricter food safety standards on farms and in manufacturing plants.

That law only applied to the Food and Drug Administration, which is still struggling to put into place the changes in the past. But that change is now starting to appear on the horizon for some farmers and food companies.

The PDA's Michael Taylor, deputy commissioner for foods, said on a new web portal called "Food Safety in Practice," that "teams of animal behavior experts must work together to achieve this goal." The PDA's Michael Taylor, deputy commissioner for foods, said on a new portal called "Food Safety in Practice," that "teams of animal behavior experts must work together to achieve this goal."

In 2010, the bill was passed by Congress. But it has been delayed by a number of factors, including a lack of funding and a lack of interest in putting the new law into practice.

The accident became a source of teasing for the mayor, and de Blasio himself suggested Monday that "no animal behavior experts and scientists have nanodized from all over the country."

"One would be expected to have more winter weather than expected," the weather forecaster said of Phil. But the Inner Circle announced the "prognostication" Monday morning. KYLE

Dr James Levine, director of the Mayo Clinic-Arizona State University Obesity Solutions Institute, said in an interview with the Associated Press that sitting is more harmful than smoking, and that sedentary habits are more lethal than other health problems.

“Running has the benefit of endorphins, and it relieves stress,” Levine said. “But if you just sit and do nothing, it has a huge impact on how we age.”

“Standing won’t make you thin, just healthier.”

Patterson said that sitting is a major health problem that needs to be addressed.

“People don’t think of sitting as a problem, but it’s a huge problem,” he said. “It’s important to make people aware of it.”

“Sitting is a major contributor to obesity, and it’s also a major contributor to heart disease and other chronic diseases,” he said.

Patterson said that sitting is a major contributor to obesity, and it’s also a major contributor to heart disease and other chronic diseases.

OBAMA

Although Chris Kyle wasn’t the only sniper that the US military had to rely on, he was the one that was the most famous. His story has been turned into a movie and has inspired many people to join the military.

“Although our focus remains on pursuing a solution through diplomatic means, we are always ready to bring economic sanctions that will help us reach a negotiated solution to the crisis,” the secretary said.

“Key plans are to be in place by Thursday to meet with our European partners at the EU summit at which we will discuss the future of the crisis,” she said.

Obama had said last week that he has been closely monitoring the situation in Ukraine, where tensions between the West and the Russian-backed separatists in the east have escalated.

He has also threatened to impose new sanctions on Russia, if it does not pull back its troops from the Ukrainian border.

“Russia will face tough economic sanctions if it does not pull back its troops from the Ukrainian border," he said.

Obama also said he was considering a new round of sanctions against Russia, if it does not stop its support for the separatists.

“I am committed to doing what is necessary to stop this crisis from escalating further," he said. "I will not hesitate to take action if necessary."

No. 3 Baylor wins 19th-straight over KU

By Cody Soto

Baylor won a 19th-straight victory over Kansas on Sunday as the Bears have now won 25 of the last 26 meetings with the Jayhawks.

The Bears are the only undefeated team remaining in the Big 12. They head into a top-20 matchup against TCU on Wednesday night. Game time is set for 7:30 p.m. on ESPNEWS.

The stakes keep stacking higher for the No. 3 Lady Bears, Baylor shut the door on Texas for the second straight time and advanced to the regular-season finale against No. 19 Kansas on Saturday.

The Lady Bears wrapped up the regular season with a 14-0 league record for the 19th straight season, and they head into Kansas with a 66-58 win over the Jayhawks.

Despite a 46-39 shooting percentage and limiting the Longhorns to only a 38.6 percentage, including 5-of-16 three pointers, the Bears pushed six-game winning streak in conference.

The Bears have the opportunity to make a big run in the Big 12, but they need to play as good as they need to push the game into the top of the conference. The Bears can take care of any conference opponent if the Longhorns are put down, but they can't do it against Texas, Kansas and Oklahoma.

Women's basketball coach Kim Mulkey protests a call during Baylor's game against Kansas on Sunday.
