Jolie’s decision promotes awareness

On Tuesday, actress and humanitarian Angelina Jolie wrote an op-ed in the New York Times titled “Braving the Perilous Duty of a Surger y” that the article revealed her choice to remove both her ovaries and fallopian tubes, which had just two years after she had a double mastectomy — a surgery she described as “shattering.”

That essay was both a rare and very personal account of Jolie’s decision, given her family’s history of cancer and a mutation in her BRCA1 gene. Previous essays like Jolie’s Posts are a step in the right direction in terms of the number of conversations about cancers that directly affect women.

One of the most pointed in Jolie’sPosts is that she made the decision to have a mastectomy as well.

While she could have solely focused on how she was going to make people feel after her decision, she chose to show how her role as a mother plays into her decision-making process.

At one point in the essay, she triumphantly states that by resisting her fears she knows she is not only doing what needs to be done to avoid cancer, but that her decision has taken control. This decision of how cancer and family relate is a topic that is especially relevant as each year an estimated 268,000 women will develop ovarian cancer, according to the Centers for Disease Control and Prevention.

In addition, the CDC also cites that breast cancer remains the most common cancer among women in the United States. Because of this, conversations regarding family and cancer in women’s lives are growing increasingly vital as research develops in the field.

“Whether a woman has kids or plans to have kids in the future, the effects of cancer that directly affect the reproductive system adds another dimension to the toll the disease can have on a person’s life,” said Jolie in her articles, deciding how to deal with cancer or the possibility of it is ultimately a personal decision. It requires research and much deliberation.

It is important to note that the only problem with Jolie’sPosts is that we need to focus on her real courage and not on the cancer treatment as a metaphor. Every athlete is a public representation of the culture we are surrounded by. Taking a dangerous individual into Dallas, the Cowboys should not have added him. It’s about pride, not news.

Goodwill is a precious resource in an environment that points outside of ourselves — this is the crux of why this inclination is so dangerous.

A helicopter crew that landed briefly in the area saw no signs of life, their French officials said.

“Everything is pulverized. The helicopter hit the top of the building, the top of a small car. No one can access the crash site,” Cil, Alpes-de-Haute-Provence, told The Associated Press.

“Everything is completely destroyed. There is nothing you can imagine,” said Bodo Hischel, principal of the school.

I won’t have enough personal money to pay for college, so I’m looking for ways to get financial aid. Loans are by far the easiest route, but a lot of schools have changed their terms and conditions. I have to resort to the financial aid office to set up a payment plan.

Jolie: Beating cancer before it even starts

The truth is still out there.

“The X-Files” will be back Jan. 24 in a six-episode event series with its original stars David Duchovny and Gillian Anderson, the network announced Tuesday. The chance revival of one of TV’s most successful so far series comes after a 13-year gap that ended in nine-season run in prime-time.

Series creator and executive producer Chris Carter will oversee the project as a decade-long effort to innovate, Carter said in a statement.

“Jolie in an Embrace

There’s no reason why the world can’t have a little more truth...”

Excited to bring back the series after 13 years, Carter declared. "We’re really excited to bring back the show after this long break. We’re looking forward to exploring new themes and stories, and to continue the legacy of our beloved characters."
Baylor will honor former basketball star and current coach Scott Drew with the retirement of her No. 11 jersey. "Can't teach that," coach Drew said. "He's big. That helps," Blatt joked. Mozgov is accustomed to defending the paint, and the Pacers coach found Mozgov’s length and size to be a blessing. "He’s a big reason for our success," Blatt said. "He’s a big reason for our defense." Mozgov was used to the defensive style of the Knicks this season, he was only getting defensive assignments that didn’t involve the ball. The tangibility of Mozgov’s physicality and his ability to control tempo in the paint would be of great use to the Pacers, who have struggled to get their players home in the later innings. Mozgov’s defense would be valuable to the Pacers, who have struggled to get their players home in the later innings. Mozgov would be a valuable asset in the paint, where he would control tempo and make the defense of the team more effective.
