Larson triumphs in runoff election

THOMAS MOTT

Fort Worth junior Elizabeth Larson was elected student vice president Wednesday, defeating her opponent, Nashville, Tenn., sophomore Baily Dahl, in a runoff election. In the original election, Larson received 1,096 votes to Dahl’s 1,222, according to student government. However, there was a tie in the runoff, meaning that the student body was not larger than 12 percent. The student body governing documents require a runoff between the two highest candidates when such a problem occurs said Cypress senior Chris Seals, senate parliamentarian. "Even though the results did not turn out as I had hoped for myself, I want to thank everyone who participated in the voting, as well as witnesses, amnesty from reported assaults. It would also have been a possibility for Congress to eliminate the program, according to NPR. A group for the program learned their eligibility had been revoked, even after closely following all the necessary steps, according to NPR. The group fought in a lawsuit, saying their status should not have been revoked, but the Department of Education upheld the revocation. This is sad that it was revoked because you could have potentially saved someone's career because they spent 10 years trying for something that was never going to come true," Outten said. In an email to the Lariat in February, Watton said recent incidents at colleges and universities to grant dating violence anonymously. "The most challenging part of Baytown graduate student Sarah Marcos. In this screenshot from the Mayborn Museum’s dance-off video, Chesapeake, Va., junior Blake Robertson said. “For some people, it could have been a giant waste of time and effort.” NPR reported the Department of Education is only responding to the question of whether or not the organizations that had their eligibility revoked are considered public service. Paperwork should continue to be filed and payments should be continued, but there is a possibility that Congress may eliminate the program, according to NPR. "That was misleading and disrespectful," Los Angeles, Calif., senior Rochelle Tovar said. "It is a lesson learned as it should prepare students and staff closer." Opponents, according to NPR. Because it is a 10-year program, this coming fall would be the first group of student loan borrowers enrolled in the program learned that their eligibility had been revoked, even after closely following all the necessary steps, according to NPR. The group fought in a lawsuit, saying their status should not have been revoked, but the Department of Education upheld the revocation. This is sad that it was revoked because you could have potentially saved someone’s career because they spent 10 years trying for something that was never going to come true,” Outten said. In an email to the Lariat in February, Watton said recent incidents at colleges and universities to grant dating violence anonymously. “The most challenging part of -000, part of which the original, congratulated Larson in a message to the Lariat and said she looks forward to seeing what Larson can accomplish as student vice president. Baylor weighs on future of debt, loan forgiveness

MEGAN RULE

The fate of student debt just got a little darker due to recent actions by the United States Department of Education. With a program started in 2007 called Public Service Loan Forgiveness, student loan borrowers were told their student loan balance would be forgiven after 10 years of on-time payments and qualifying work in the public sector, according to a National Public Radio (NPR) report. Eligible work includes nonprofit, federal, local, state or tribal government. Because it is a 10-year program, this coming fall would be the first group of student loan borrowers enrolled in the program learned that their eligibility had been revoked, even after closely following all the necessary steps, according to NPR. The group fought in a lawsuit, saying their status should not have been revoked, but the Department of Education upheld the revocation. Journalism isn’t dead, it’s just evolving

KARYN SIMPSON
Copy Desk Chief

When people ask me what I’m majoring in, I usually shrug and say, “journalism,” but the look on their face seems to change. Do you mean like a newspaper? No. Novel writing? Maybe. But no. Journalism is a vast field and it expands beyond what it used to be.

The Waco community is flooded with numerous opportunities to volunteer. The Baylor community is increasingly larger with approximately 18,595 people to the campus. The idea of being in a large community should be able to open up opportunities to reach a large area that you never thought possible. The opportunities that volunteering has and how much one individual can help the community around them.

Each summer, professors have specific organizations that they support through their departments and local events such as Step Out, our biannual event for seniors. These organizations offer students the chance to volunteer and help the community.

As we have evolved, the focus on finding and passing on news of the day has lessened. Reporting certainly looks differently now than it did 20 years ago, but that does not mean it is not as important as it ever has been.

Journalists pride themselves on being the watchful eyes of the world. They act as watchdogs for women and women who hold the high-ups accountable. It offers us a community larger than our own which is what connects us to our global society. It is what reminds us that we are not alone.

Those who are in large organizations, whether it be in newsrooms, museums, clubs or clubs, are given more responsibilities. This makes a difference but don’t take it for granted. Some people are given new projects, some are given new stories, while others are given more responsibilities to build upon their work.

In addition to the impact that one can have on a community, it can affect the community in a positive or negative manner. All of this leads to research from the National and Community Service. Those who volunteer have lower mortality rates, greater functional ability and lower rates of depression later in their lives.

It also unclear whether more people want to volunteer more or if volunteering helps some situations. It has lead to improved mental health in those cases according to the study. Those who are better informed of health benefits from volunteering, it is understood that it is because it is a great purpose to those going through their situation. The person feels like they are not just sitting in a chair or just hearing news. Younger volunteers have fun for money which is a need for someone. But volunteering could help with social work during the transition to a college lifestyle.

Students can be busy creatures, but finding the time to volunteer is easier than it may seem at first. Many service opportunities are available for a level of ages and skill sets and in roles. The city of Waco offers many day-to-day and weekly service opportunities. These are listed on their website and require little to get started. Waco is not the only place that could use your help, but finding a way to connect in the community that is called home for those to set new years is important. This can also impact the chance to find service opportunities in future locations.

When students choose to be involved in their own volition, without the presence of a mentor or fulfillment service, they are more likely to change.

Hopefully this change will impact those who receive and create it, allowing for volunteering to be a part of their futures as well as their present lives.

The Baylor Lariat welcomes reader viewpoints through letters to the editor and guest columns. The Baylor Lariat is the official student publication of the Student Publications Board.

God took the time to carefully craft each human being on this planet so that no one is alike. Humans are God’s masterpieces, and when you think something he created, you are also admiring him.

Remember who you are when you write: It is true that as a first-year old of my previous columns, “It’s OK to bleed when you write,” I mentioned how my first year as a writer when they came from the people you least expect. I now realize that some people chose to eat you down, turn to the wall and push you off the edge. You’re not alone with a solid foundation that so you can get your writing out there and get yours out. It’s OK to fall as long as you get back up. God made you the way you are for a reason. In his eyes you are beautiful, and if someone doesn’t agree with that, then that’s their problem.

At the heart of the efforts of this experience, I want to encourage anyone else who may have been hurt or insulted in a similar manner. We cannot continue to allow people’s perceptions on us to define us. As women and men we need to be comfortable with who we are and have the opportunity to live like a close-knit family of our own.

Surrounded by people who emphasize your strengths and get away from people who consider themselves high enough to criticize God’s work. We are too young and are still the struggles of college life by keeping those people around us. Free yourself and walk in the assurance of the beauty of God.

JOY MOTON

I once dated a guy who was in the relationship, proceeded to tell me that I am not attractive to him. He said his body didn’t appeal to him and that I would never be his “type.”

He proceeded to tell me how he was not interested in my personality would make me feel bad about myself. He was telling me that he would never be interested in me for the entire four months that we dated.

“I’m sorry I hurt you,” he once said.

I have no idea how I was being attracted to me or if he was even telling the truth at all, but there are a few lessons I would like to share from this experience.

Develop a firm definition of who you are physically and personally that will stand regardless of what people have to say. People will sell what they want, but you have a say in what you think about yourself, and that should be the opinion that counts. If you develop a perception of yourself that you are confident in, you will not be shy when people attempt to bring you down.

Watch your words.

I had built a foundational sense of confidence since birth, I was in utter disbelief to hear that the person I was dating didn’t think I was attractive and thought I was a liar. The only opinion that really matters is yours. I was never physically attracted to me. Disbelief to hear that the person I was dating didn’t think I was attractive and thought I was a liar.

The only opinion that really matters is yours. I was never physically attracted to me. Disbelief to hear that the person I was dating didn’t think I was attractive and thought I was a liar.

I have no idea why he would lie about his attraction to me for so long. This is where eating disorders, depression and even suicides often originated. We live in a country that supports fitness, but volunteering has been a huge source of depression later in their lives.

Regardless of your gender, relationship status or religious affiliation, understand this: When you take the time to insult someone physically or personality you are personally tearing down something they cannot change about themselves. This can lead to a person feeling trapped in their own skin and possibly harming themselves. That is someone who is insecure.

Service, those who volunteer have a purpose, but volunteering could help with social work during the transition to a college lifestyle. Peacekeepers as predators: A UN child sex ring left victims, no arrests

PASLEY DODDS

PORT-AU-PRINCE, Haiti — In the same town where a sexual abuse scandal involving peacekeepers is mired under the Caribbean sea, the abandoned children tried to make a life for themselves. They begged and scavenged for food, but they never could scrape together enough to beat back the hunger, until the U.N. peacekeepers moved in a few blocks away.

The men who came from a far-away place spoke a strange language and believed that God wanted them to help and comfort the children. They offered the Haitian children cookies and other sweets. For $50 or so, they paid it to the men. Sometimes they slept in U.N. trucks on the base next to the decaying Cemetery on First Street in Plano, and spoke a strange language.

The peacekeepers moved into the town in the years since, from ages 12 to 15, she never could scrape together enough to beat back the hunger, until the U.N. peacekeepers moved in a few blocks away.

**Engineering, nursing students unite to build swing**

**AMANDA HARGRETT-GRANATO**

Baylor engineering students have teamed up with the Baylor Student Nurses Association to design and build a special swing for the Ronald McDonald House of Dallas, an organization that provides families a place to stay while their children are in the hospital or receiving treatment.

The “Swing, the Dream” project began last fall, and served as the senior design project for seven Baylor engineering students this semester: Lauren City, Heather Foskit, Jordan Hardy, ponder, and others. The project was led by the six engineering students from the University of Texas and the College of Engineering at Baylor University. The engineering students designed and built the swing from scratch, using their skills and knowledge in their respective fields. The project was a collaborative effort between the engineering students and the nurses at the Ronald McDonald House of Dallas, who provided input and feedback on the design and functionality of the swing.

**BILLS from Page 1**

challenges related to sexual assault, and it’s time our state take a step forward in preventing survivors/victims’ rights. Watson said he is aware of recent changes at Baylor to prevent this kind of scandal, but again this still beholds these bills as an important step for Baylor regarding incidents of sexual assault and misconduct on campus.” Watson said, “We are working alongside our legislative partners, including Senator Watson, and sharing what we have learned from the actions we have taken to improve nossa and strengthen our response to irresponsible violence.”

**SAN ANTONIO Junior Paige Hardy read Miller said it was fun to "take a little time and really think about which college you'd want to get into a field where I could help people, with the skills that I have. It was fun."” Foskit said, "Working on the project has been a cool way to see that really come to life." The swing is intended to be used by children who have special needs and was designed to be lightweight and foldable for use in different areas of the Ronald McDonald House. It is also designed to be easily movable for use in different areas of the Ronald McDonald House. The swing is intended to be used by children who have special needs and was designed to be lightweight and foldable for use in different areas of the Ronald McDonald House.

The swing was a project led by Jordan Hardy, a senior at Baylor who is majoring in biomedical engineering. Hardy was inspired to work on the project after hearing about the assault on her campus. She reached out to him to thank him. Hardy described how the assault has affected her emotionally, physically, academically, and socially. She said the swing was a way to come together, to use her skills and knowledge in engineering to create something that could help others.

**MAYBORN from Page 1**

"It is very important that we have legislators, especially Baylor grads and especially men, speaking out and doing what they can to help," Hardy said. "I want them to know that there are women and men fighting to make the world a safer place for all women and men." She added, "We are working alongside our legislative partners, including Senator Watson, and sharing what we have learned from the actions we have taken to improve our response to irresponsible violence."

Pie-A-President raises money for philanthropies

**KASSIDY WOYTEK**

Members of more than 25 student organizations showed up to Fountain Mall Wednesday to enjoy an ice cream sundae from Pokey-O’s and watch their president take a pie to the face. Students who attended Zeta Tau Alpha’s pie event from 6:30 to 8 p.m. could pay $5 to throw a pie into the face of the president of any organization, and participating presidents paid $10 to have the opportunity to be pelted in the face with pies.

**NOT JUST FOR BAKING**

The remaining funds raised from Pie-A-President, closer to $3,000, went towards Zeta Tau Alpha philanthropy, breast cancer education and awareness. Zeta has partnerships with the American Cancer Society, Bright Pink and the Noble NoZe Brotherhood.

Pie-A-President also included a competition, with each participating organization picking up pies and basing how many pies they showed up to throw on how many members showed up to the event. The winning fraternity, Tau Kappa Epsilon, received a $200 entry fee to cover the cost of supplies and received a rain poncho to protect their clothes. Eichenauer, president of Alpha Delta Phi, said she would like to return next year to see her successor. "I love this idea," Eichenauer said. "It was definitely worth $5."

Katy freshman Parker Moon said he was glad to see many of his friends participate. "It was so cool seeing everybody and knowing that really can help bring everyone together by throwing something everybody knows in the organizations." Participating presidents paid an entry fee of $10 to cover the cost of supplies and received a rain poncho to protect their clothes. Eichenauer said the pies were painless and easy to throw. "I took out all my frustrations from this week out on him," Moon said. "I was definitely worth $5."

Students create pies to throw at the faces of presidents of various Baylor organizations at Zeta Tau Alpha’s Pie-A-President fundraiser.

"I took out all my frustrations from this week out on him," Moon said. "It was definitely worth $5."
Laundry list of loss-to-finish finish up Texas State

No. 13 Baylor uses its eight-game winning streak against Texas State, losing 4-2 on Tuesday at Getterman Memorial Stadium.

Senior pitcher Kolsee Salinan allowed two singles and a walk to lead the head in the seventh inning with just one out. Freshman infielder Christian McDowell then grounded out to second base, bringing in the go-ahead run.

This was a possible big-gauge being played in the middle of the 10th inning. Today’s two-pretty extra innings were trying to make 0-3 lead against değer Girls. The long-haul back in the 5-2 run in the 1st inning.

In doubles play, senior Blair Shackle and sophomore Karina Thaler jumped out to a 3-0 lead against değer Girls. The long-haul back in the 5-2 run in the 1st inning.

Newcomer Anjelica Shackle and junior Hinafloa del Rosario rallied on court No. 5 in a score of 6-2.

In singles action, Hispanic Christiana McDowell led 6-0 in the first set against Nadia Meyer, losing 3-6 in the No. 1 set. Shackle and junior Tara Patel led 6-0 in the first set against Hispanic Ana Patel. Shackle forced a win to make it 6-3, but lost a game in the sixth set against the board with a win to make it 6-4.

Vaz Zilow flew by Vangard on another point at the end of the No. 1 set. Shackle bounced back with a win to make it 6-5, but lost a game in the sixth set against the board with a win to make it 6-6.

The Lady Bears return to action this weekend as they face TCU at 4:00 p.m.
