Search committee to hold community listening sessions

KALYN STORY  Staff Writer

Baylor’s presidential search committee is holding its first community listening session at 7 p.m. Thursday at First Baptist Church Waco.

The listening session will focus on what personal qualities and experiences a leader should have to assume the role of Baylor president.

The next president of Baylor University will have to make efforts to further strengthen Baylor’s culture in areas of excellence for higher education and success in the rich tradition of Christian commitment,” according to the search committee’s notice.

The committee hopes the listening session will allow communities with interest to express their concerns and pose questions.

“The questions have to be answered by the people who know them, beloved and affected by Baylor’s president,” presidential search committee vice chair Jim Dirksen said. “We need the community’s help so we can form the profile of who you’re looking for.

The committee will take

Live from the Lariat
Lariat TV News airs on local college channel

MEGAN RULE  Staff Writer

The city of Waco’s local college cable channel has partnered with the Lariat Television (LTVN) to air news broadcasts, allowing Baylor students to communicate information directly to the Waco community.

“This was a dream of mine from their high school years. When we were looking at adding broadcast to the news rate, I knew there was a college channel,” said Paul Carr, director of undergraduate students the opportunity to go through a review process before production has grown to include four full-time students and one unpaid intern.

“Told (Bryce) of my dreams of broadcast to campus,” said Paul Carr, director of the Baylor site.

The Baylor Undergraduate Research in Science and Technology (BURST) journal can also be found online, and journal can also be found online, and journal can also be found online, and journal can also be found online, and

According to the Scientia

“Overall, it really gave me a new-found appreciation for research at its core and how deeply you have to go in order to consolidate information,” said Berry. “It really put to life this idea that this is a reality and we understand what is happening. Then, after the data is complete, be able to collaboratively and concisely share with others.

Bryant said the entire research and publication process took about a year from start to finish.

Technology use affects mental health

RAE JEFFERSON  News Editor

It’s an undeniable fact that technology runs the average college student’s life – and is having an impact on their mental health.

Dr. James Roberts, Bos, H. Williams professor of marketing at Paul L. Foster Campus for Business and Innovation, said the nature of modern connectivity dictates how college students interact with technology, especially

Technology doesn’t have to go to keep up with people or use some technology all the time. Roberts said, “It’s almost as even a choice anymore.

On one hand, technology offers many resources to assist students with mental health issues. Smartphone apps, online articles, support groups and video

The dangers of driving while tired

Every vote matters

GENESIS LARIN

For many, the 2016 election will be the first they will participate in. As a first-time voter, I was eager to exercise this symbolic right of citizenship. However, my vote as being strategic showcases how my views have changed. I have moved from a Republican to a Democrat for this election. While I voted for the same party last year, I feel that I have grown out of the political party remains open, it is not the best move for someone running for president, I was shocked when

I continued to watch the debates and see the candidates at rallies, and I found my incentive to vote began to change. I was a Democrat, but I wanted to move towards a party that aligned with my views, but I was also taking into consideration their probability of victory.

After my favorite Republican candidate dropped out, I was left with two choices. While I did not support either candidate completely, I decided to make sure I voted for one. Unfortunately, I knew that my vote would not be enough to change the election outcome.

I continued to watch the debates and see the candidates at rallies, and I found my incentive to vote began to change. I was a Democrat, but I wanted to move towards a party that aligned with my views, but I was also taking into consideration their probability of victory.

**Case changed from Criminal Mischief to Theft on 09-26-16.**

**Case Update**

*Date:* Sept. 26 at 2:50 p.m.

*Location: Baylor Hall*

**Summary:** A Baylor officer was dispatched to a report of criminal mischief at the above location. Upon arrival the officer observed a damaged lock on one of the doors. Photos were taken and Baylor Facility Services was notified.

**Case Disposition:** Case changed from Act to Closed on 09-26-16.

---

**Fire**

**Date:** Sept. 21 at 3:30 p.m.

**Location:** Teaching and Computer Science Building

**Summary:** A Baylor officer was dispatched to the above location in reference to a live report of a small experimental fire. The officer was informed that two students had been doing an experiment causing a 2- to 3-inch flame out of a cup. The subjects put it out with a fire extinguisher. There were no injuries, a common area in the building and the Fire Safety Specialist was notified.

**Case Disposition:** Closed

---

**Criminal Mischief**

**Date:** Sept. 25 between 6:22 p.m. and 7:30 p.m.

**Location:** Penland Hall

**Summary:** A Baylor officer was dispatched to the above location to take a theft report. The complainant advised he had been doing laundry and upon his return his clothes valued between $1,000 to $2,500 were missing. The case remains active under investigation.

**Case Disposition:** Case changed from Act to Unfounded on 09-26-16. Additional contact was made to the above location in reference to a burglary from the above location. Baylor officers were returned to the front counter of Penland. He believes someone may have mistakenly grabbed them.

---

**Theft of Property over $750 under $2,500**

**Date:** Sept. 25 between 6:22 p.m. and 7:30 p.m.

**Location:** Penland Hall

**Summary:** A Baylor officer was dispatched to the above location to take a theft report. The complainant advised he had been doing laundry and upon his return his clothes valued between $1,000 to $2,500 were missing. The case remains active under investigation.

**Case Disposition:** Case changed from Act to Unfounded on 09-26-16. Additional contact was made to the above location in reference to a burglary from the above location. Baylor officers were returned to the front counter of Penland. He believes someone may have mistakenly grabbed them.

---

**Burglary of a building**

**Date:** Between 9 p.m. on Aug. 18 and 6 a.m. on Aug. 19.

**Location:** McLane Stadium

**Summary:** While following up on a previous burglary, Baylor officers advised that another burglary from the concession area at the above location had taken place. The complainant advised that four cases of red Gatorade and one case of yellow Gatorade, valued at $100 each, were missing from inventory. All information was recorded and this case remains open pending further investigation.

**Case Disposition:** Case changed from Act to Suspended on 09-22-16, until further leads can be developed.

---

**Theft of Property under $100**

**Date:** Sept. 26 at 2:50 p.m.

**Location:** Baylor Hall

**Summary:** A Baylor officer was informed of a missing evacuation sign located on the second floor near the exit. The sign was valued at $30 and there are no known suspects at this time. There was some minor damage to the sign. This case remains active pending further investigation.

**Case Disposition:** Case changed from Suspended to Unfounded on 09-26-16. Baylor officers support the above location.

---

**Criminal Mischief**

**Date:** Sept. 14 at 11:05 p.m.

**Location:** McLane Hall

**Summary:** A Baylor officer was dispatched to the above location to take a theft report. The complainant advised a case of Lays chips and several bottles of water were missing from inventory. All information was recorded and this case remains active pending further investigation.

**Case Disposition:** Case changed from Act to Suspended on 09-22-16, until further evidence can be developed.

---

**Thief of Property over $2,500 under $30K**

**Date:** Sept. 20 between 6:22 p.m. and 7:30 p.m.

**Location:** South Russell Hall

**Summary:** A Baylor officer met with a student at the Police Department lobby to take a theft report. The complainant advised three Fiendishness machines were missing from the pass through refrigerator. Estimated value is $1,000 per machine. The case remains active under investigation.

**Case Disposition:** Case changed from Act to Suspended on 09-22-16, until further evidence can be developed.

---

**Criminal Mischief**

**Summary:** A Baylor officer was dispatched to the above location in reference to a burglary from the above location. Upon arrival the officer observed a damaged lock on one of the doors. Photos were taken and Baylor Facility Services was notified. Additional contact was made to the above location in reference to a broken lock on one of the doors. Photos were taken and Baylor Facility Services was notified.

**Case Disposition:** Case changed from Act to Closed on 09-26-16.

---

**Case changed from Criminal Mischief to Theft on 09-26-16.**

**Case Update**

*Date:* Sept. 15 at 12:01 a.m.

*Location: Perdall Hall*

**Summary:** A Baylor officer was dispatched to a report of criminal mischief at the above location. Upon arrival the officer observed an area sign missing from the third floor. This case is active pending further investigation.

**Case Disposition:** Case changed from Act to Suspended on 09-26-16.
Train crashes in New Jersey

DAVID PORTER AND KAREN MATTHEWS

BERKLEY, N.J. — A multi-car commuter train crashed through a station and came to a halt in New Jersey on Thursday, injuring more than 100 people in a spectacular crash that renewed concern about whether long-delayed automated safety technology could have prevented tragedy.

People who stumbled out of the train—pale, bleeding and frightened—hurried across the waiting area toward emergency services and doctors. The second car of the train, carrying the engine along with a number of commuters, was heavily damaged, the station authority said. Some commuters who were on the train said they were hospitalized, some in serious condition, with injuries that included broken bones, bruises and gashes.

"The train came in at much too high a rate of speed, and the question is: Why is that?" said Christie. New York Gov. Andrew Cuomo said investigators will determine whether the explanation was equipment failure, or an act of negligence or something else.

"We’re together, but we’re wrapped up in our phones, and it’s really easy cause conflict for health," said Dr. David Roberts, an assistant professor of marketing at Paul L. Bucy, who was sitting in the third or fourth car when the train entered the station. "The phones are right in front of the commuter, so when they are neglecting their mobile devices, they are neglecting their mental and emotional well-being." Roberts said.

The train’s engineer was pulled from the station’s engineer’s compartment because investigators to pull the second recorder from the train. The device contains information on speed limit heading into the station is 10 mph. Roberts said. The National Transportation Safety Board planned to pull off one of the black boxes Monday evening from the locomotive at the back of the train. The device contains information on the engine’s speed and braking.

Roberts, who is a well-enough investigator to find the second conductor in the engine’s compartment because of the collapsed roof and the possibility of asbestos in the old building. NTSB Vice Chairwoman Bella Dinh-Zarr said. Investigators will examine the engineer’s performance and the train’s speed at the moment of the crash, among other issues, she said. They also plan to look into whether positive train control — a safety system designed to prevent accidents by overriding the engineer and automatically slowing or stopping trains that are going too fast — could have helped.

None of NJ Transit’s trains is fully equipped with positive train control, which relies on radio and GPS signals to monitor trains’ positions and speed. The NTSB has been pressing for some version of the technology for at least 40 years, and the industry is under government orders to install it, but regulators have repeatedly extended the deadline at railroad’s request. The target date is now the end of 2018.

"It’s a question of whether we’re ever going to be caught up in technology," said Dr. David Porter, chair of a Problem???

"Launching Lariat Television News is a revolutionary step in the accomplishment of the Baylor Lariat," said Carr. "To be on TV is bigger than just being on the internet; it will change the game for them when they’re looking for jobs."

Grab your fanny packs and flower crowns: ACL is here

LINDSEY MCELMORE  
BRAID MURPHY

Austin City Limits (ACL) is right around the corner. Starting today through Sunday, Oct. 5, ACL music fest goeswild with the musical capital of the world to see artists such as Mumford & Sons and Kanduick Lamar. Willie Nelson and the Chainsmokers. We have compiled a list of 10 essential items everyone should take with them to ACL:

1. ACL music festival official app (#aclfest)
Download the official ACL app for wristband activation, festival updates, and vendor products inside Zilker Park during the festival without needing to take your wallet out of your bag or pocket.

2. Wristband (or Cashless):
Your wristband is your ticket, so don't leave home without it. Activate your wristband in advance by using the official ACL app. If you have any issues, ACL cashless is a great option to pay for anything. ACLbecause you can have the look of jewelry. The are great for ACL because you can have the look of jewelry without the concern of losing expensive pieces. Make popular in 2013 by Miranda Lambert, you can purchase these vintage accessories online or in stores like Sephora, Target and many famous stores across the mall.

3. Drawstring bag/Fanny pack:
The lightweight durability of these bags are what makes them a go-to for music fans. A drawstring bag provides the ability to be hands-free as you embark upon your hands-free music experience. Although these bags aren't as big as a standard backpack, but it's perfect to carry your瞭 and add some color to your look.

4. Bandana/Flower crown:
Bandanas and flower crowns are music festival staples. Snagging a Bandana with water and wringing it out before your hand won't look so bad if you get too hot. Bandanas and flower crowns are a great way to keep out of the sun and add some color to your look.

5. Flash tattoos:
Flash tattoos are temporary tattoos that are commonly meet cool or brightly colored and designed to look like jewelry. The are great for ACL because you can have the look of jewelry without the concern of losing expensive pieces. Make popular in 2013 by Miranda Lambert, you can purchase these vintage accessories online or in stores like Sephora, Target and many famous stores across the mall.

6. Portable charger:
For any long event, Snapchats and other social media posts drain your phone within the first few hours. Putting your phone on autopilot mode that posting at a later time is a great way to save battery power, but portable chargers can help recharge your battery. These are small, affordable and worth the investment.

7. Reusable water bottle:
The lightweight durability of collapsible plastic bottles you run out of water. An interesting fact is that collapsible plastic bottles are created by a Boulder aluminum. festival stalls are located throughout the festiﬁcal grounds, and you can also look for resti stations on the map when using the official ACL app.

8. Festival toys:
Festival toys such as hula hoops and light-up gloves are fun ways to enjoy the music without being too busy in the crowd. A festival toy doesn’t necessarily have to be a toy, just a tool to spend your time between artist performances or in open spaces. Hula hoops, light-up gloves and Frisbees are common sites and an interesting way to meet new people. Many hula hoops are collapsible to take up little room. Music festivals are the perfect opportunity to try something new and old and make new friends.

9. Reusable water bottle:
ACL allows festival-goers to bring collapsible water bottles. Bring a collapsible bottle, so you’re carrying extra weight or taking unnecessary space in your bag when you run out of water. An interesting fact is that collapsible plastic bottles are created by a Boulder aluminum. festival stalls are located throughout the festiﬁcal grounds, and you can also look for resti stations on the map when using the official ACL app.

10. Festival toys:

This week in Waco:

Today:
6-7 p.m. — Baylor National Pan-Hellenic Council Greek Student 2016 — Den of Bill Daniel Student Center
7 p.m. — The Blackwood Quartet performs “The Gospel Side of Elvis.” Bosque Arts Center

Saturday:
8 a.m. — “Run Waco — Waco, Heritage Square Park Austin & North Park

Sunday:
All Day — Waco Cultural Arts Center for Indian Spring Park

Monday:
3 p.m. — Baylor School of Music String Chamber Music Recital. Meadows Recital Hall in the Glenn D. McCrory Music Building
7 p.m. — “Lo and Behold” plays at Movie Mondays at the Hippodrome

TOP: Among the essentials for Austin City Limits are collapsible water bottles, sunglasses and comfy shoes. RIGHT: The ACL music festival official app (#aclfest) provides tips and tricks attendees should know.
Bears brace for test against Cyclones

NATHAN KIEL
Sports Writer

After being tested by the Cowboys' talent and weather, the Bears' defense came up with several clutch plays last Saturday to preserve a 35-24 victory over Oklahoma State and remain undefeated. Now Baylor football turns their attention to a road matchup with the Iowa State Cyclones.

Acting head coach Jim Grobe was pleased with the Bears after their hard-earned victory last week and is looking to see that same kind of play carry over to Saturday.

“I thought it was a good challenge for us. I liked Oklahoma State’s football teams,” Grobe said. “I like the way they’re coached. I know the level of competition was going up.” I was excited to see how our guys would respond to that kind of playing field, and I think they did a great job.

The Cyclones enter the contest at 1-1 under first-year and former TCU head coach Matt Campbell. However, the Cyclones are coming off their loss last week, a convincing 44-10 win over San Jose State.

For Russell and the offense, it has been a priority to start each game fast and get into an offensive rhythm. After having struggles to start their first three games, the Bears were able to turn things around last week as they scored on their opening drive.

That’s who they are. They’re the offensive line at Baylor,” Russell said. “They’re known for running the ball well. They’ve really come into their own, and created their own image. It’s cool to see how they’ve grown together.”

The Bears defense has been stout thus far. It has faced numerous, made huge stops on fourth downs, repeatedly gotten out of bad situations and gotten the ball back to Russell and the offense. However, Iowa State will certainly throw some wrinkles at the Bears defense.

This will be the sixth time the league holds its title game in Florida, having played it in Jacksonville from 2005-07 and in Tampa in 2008 and ’09.

The conference made the announcement in March and baseball in May.

Details were scarce about the process by which the ACC selected its new title-game location, with Commissioner John Swofford saying he couldn’t provide additional information on how the league reached out to potential hosts.

The Bears enter Saturday’s game with a 3-0 record and have scored 96 points in their last two games.

The conference officially moves to Orlando immediately emerged as an obvious choice.

The league has not announced the new sites for the other championships it pulled from North Carolina. That decision came days after the NCAA said it would relocate its championship events from the state.

The Bears offense has been the growth and development of the conference. For Russell and the offense, it has been a priority to start each game fast and get into an offensive rhythm. After having struggles to start their first three games, the Bears were able to turn things around last week as they scored on their opening drive.

That’s who they are. They’re the offensive line at Baylor,” Russell said. “They’re known for running the ball well. They’ve really come into their own, and created their own image. It’s cool to see how they’ve grown together.”

One of the keys that has been crucial to the offense has been the growth and development of the offensive line. Quarterback Joel Lanning and sophomore Jacob Park to exploit the offensive line at Baylor,” Russell said. “They’re known for running the ball well. They’ve really come into their own, and created their own image. It’s cool to see how they’ve grown together.”

The Bears defense has been stout thus far. It has faced numerous, made huge stops on fourth downs, repeatedly gotten out of bad situations and gotten the ball back to Russell and the offense. However, Iowa State will certainly throw some wrinkles at the Bears defense.

“I thought it was a good challenge for us. I liked Oklahoma State’s football teams,” Grobe said. “I like the way they’re coached. I know the level of competition was going up.” I was excited to see how our guys would respond to that kind of playing field, and I think they did a great job.

The Cyclones enter the contest at 1-1 under first-year and former TCU head coach Matt Campbell. However, the Cyclones are coming off their loss last week, a convincing 44-10 win over San Jose State.
