LIFT-OFF

Waco Regional Airport is in the process of creating a master plan to implement changes over the next 20 years.

The northbound lane of I-35 at University Parks Drive experienced a three-hour closure shortly after 7 a.m. Tuesday because of an accident involving three truck-rollover Tuesday morning.

Captain Patrick Veselka of the Waco Police Department said the accident occurred between two 18-wheelers. One of the trucks involved was a FedEx truck.

No one experienced serious injuries, said Sgt. W. Patrick Souvann of the Waco Police Department. Veselka said the accident was caused by a tire blowout from one of the 18-wheelers. Although the accident was sizable, no one was transported to the hospital for significant injuries.

The traffic was cleared by late morning. Swanton said.

The report also states that someone experienced a physical abuse every 60 seconds, and between the age of 18 to 24 are most likely to suffer abuse at the hands of their current or former partners.

“The impacts it has on the community is it gives the public a sense of security and a good sense of what we want to anticipate to develop in terms of infrastructure,” said Joel Martinez, director of aviation at the Waco Regional Airport.

A public information session was held on Tuesday where members of the Waco community were able to share their opinions about what potential airport renovations they want, said Jacob Bell, client manager for Walker Partners.

Among the discussion were talks of expanding the airport, generating income from expanding the parking area and lengthening the main runway, but nothing had been decided officially.

“Lastly, the master plan is essentially a 20-year road map that considers some alternatives and brainstorming,” Bell said. Walker Partners is the engineering company that is working with the airport on the project. Bell also works with the company for three and a half years. Also working on this project is Coffman Associates, Maritza Geographic and BKMG Consulting.

“Walker Partners provides a partnership for the airport.” Martinez said. “They are airport enthusiasts and play a critical role. It is not only our future but our current construction. They are an extension of our staff.”

Bell said the Federal Aviation Administration provides funding in order to keep airports up to standards. He said the case of the Waco Regional Airport, the FAA supplies about 90 percent of the funds and the city of Waco supplies the other 10 percent for the master plan and related renovations.

“The FAA has its standards and rules, and say this is how you have to do it,” Bell said. “But up to a point in most of life, there are situations that come after that don’t fit the budget,” Bell said. “Then you have to talk about having what they call a modification standard, so there will be a few situations when we’re going to have to work with the FAA.”

The event’s post-debate lecture and open discussion is meant to encourage students to engage with others on topics such as the importance of the debates and the election, and the role of students in the political process.

### Waco airport plans infrastructure projects

## Student government to host debate watch party

**BROOKLYN BENTLEY**

Reporter

After a nail-biting, 91-minute round into the first presidential debate and 63 minutes into the second debate, Hillary Clinton and Donald Trump will have their final head-to-head meeting before the presidential election is November 8 at 9 p.m. tonight.

Proving to be popular and detailed, Baylor student government will hold an open watch party for the first presidential debate on Sept. 26, encouraged to watch the group discussion by Dr. Patrick Flores, an associate professor of political science.

“We’re hoping that there will be a very large turnout from multiple different organizations and students who are looking to become more informed about the election and the electoral process,” said Maddie McPherson, assistant director of community engagement.

McPherson said student government members hope the event will allow students to voice their opinions freely among their peers, regardless of their political ideologies.

“This will be a good opportunity for people to express their thoughts and what they really care about,” said Longview senior Patricia Allen, Baylor College Republicans co-chairman. “Hopefully, we can have open discussion during that time between different ideologies in a coherent manner.”

The event’s post-debate lecture and open discussion is meant to encourage students to engage with others on topics such as the importance of the debates and the election, and the role of students in the political process.

### DEBATE

It goes by many names: morning joe, cappuccino and the like. But coffee comes in many forms: straight, latte and expresso. Whatever the form, if you call it, coffee is the fuel that keeps us students going throughout each semester.

Coffee consumption is on the rise by 0.1% each year, or, others refuse to drink it – a study by the Harvard Medical School demonstrated that coffee drinkers were less likely to suffer from certain conditions than their non-coffee drinking counterparts.

One misconception of coffee is that it causes dehydration. While it may seem like coffee wards off some of the bathroom remedies I learned during my study by the University of Berkley. In fact, the study showed that even a maximum of eight cups of pure water – probably because it is composed of mostly water. Coffee provides a nice caffeine boost which is essential come finals time.

Speaking of finals week, coffee is a much better alternative to the many sugary energy drinks students stock up on for long nights of cramming. For example, a single can of Red Bull contains 27 grams of sugar as opposed to zero grams in a cup of coffee. If you choose to drink your coffee black, you won’t have to worry about how much sugar is equal in the amount of sugar. The benefits of coffee are never shorter than energy drinks. A twelve ounce bag of coffee from Comcast Gardens, which makes about 14 cups.

Coffee also contains antioxidants. Harvard Medical School reported that “coffee contains antioxidants that may offer significant protection against developing diabetes, which is a major heart disease risk factor.” The same report also said that the number of people who were 50 or less old had heart cancer compared to their non-coffee drinking counterparts.

Some may be wary of drinking coffee because of the many addictive qualities. While it is true that normal coffee drinkers experience decreased headaches when they miss a cup, this is also true for those who regularly consume caffeine. A Mayo Clinic study showed that when a cup of coffee is drunk, about one ounce of water is retained by the body for muscle and bone. This may cause some to feel less thirsty than usual after their coffee.

The benefits of coffee are too great to forgo. The risk may not be worth it for you. Yet, if you are going brave and drinking coffee, it is probably better than what you might experience by what you would.
Nigeria negotiates release of 83 more abducted girls

MICHELLE FAUL

ARJIA, Nigeria — Nigeria’s government is negotiating the release of another 83 of the Chibok schoolgirls taken in mass abduction two and half years ago, but more than 100 others appear unlikely to leave their Boko Haram Islamic extremist captors, a community leader said Tuesday.

The uninvited girls may have been released by Boko Haram or are ashamed to return home because they were forced to marry extremists and have babies, chairman, page Boris, of the Chibok Development Association told The Associated Press in a telephone interview.

Boris said the 21 Chibok girls freed last week in the first negotiated release between Nigeria government and Boko Haram should be allowed to stay abroad, because they probably face stigma in Nigeria.

The girls and their parents were reunited Sunday and are expected to meet with Nigerian President Mohammadu Buhari on Tuesday or Wednesday, Boris said.

Buhari said Monday that his government is prepared to talk with Boko Haram as long as the extremists agree toStudio organizations like the International Committee of the Red Cross, which was an intermediary in the last week’s release.

Some 276 schoolgirls kidnapped from a school in Chibok in April 2014. Dozens escaped early on April 27. But at least a half a dozen girls died in captivity, according to the newly freed girls, Boris said.

All those who escaped on their own leave Chibok because, even though they were held only a few hours, they were labeled “Boko Haram wives” and imprisoned, he said. At least 20 of the girls were labeled “Boko Haram wives” and were taunted, he said. At least 20 of the girls were captured and “Boko Haram wives” and were taunted when they were held only a few hours, they were labeled “Boko Haram wives” and imprisoned, he said.

Bitrus said the 21 girls mentioned last week’s release.

“Mr. Trump has a way to get people excited, I would say. It’s on both sides,” Bitrus said.

The reluctance between Nigeria government and Boko Haram should be allowed to stay abroad, because they probably face stigma in Nigeria.

“The unwilling girls may have been released by Boko Haram or are ashamed to return home because they were forced to marry extremists and have babies,” Bitrus said.

December, students will have the chance to participate in multiple public information workshops, where they will be able to ask questions and receive guidance on how to become informed, regardless of whether they are voting for one of the major party candidates. "Students should be civically engaged and have their voices heard," said McBride, who was chief of staff for former President Bill Clinton. "It's a fun process to be a part of. I think all told, it's going to be a year or year and a half long process." 

"Michelle Obama is the most valuable player of the election," said McBride. "I'm glad that we can sit down together and discuss this. It's a really important issue, and it's important to talk about it in this current climate."

"This is my second year coming to this event, and I choose to lead this committee because Alpha Chi Omega is such an important part of our lives, and I want to be able to make a difference in the world," said Allen. "I'm glad that I can be a part of this and watch this debate without pulling each other's hair, so we wish to attend."

"We will conduct an open house where questions will be answered by the master plan team and have the opportunity to engage in the early evening at the Waco Regional Airport Terminal Building. The next meeting will be on Tuesday, January 31st."

"The second phase will be crafting the future in a positive way." 

"It's unusual for a sitting first lady, or a sitting president for that matter, to have the opportunity to talk to voters with her powerful rhetoric. And she can be the emotional center as a campaign whose candidate is not known for projecting warmth."

"Michelle Obama is seen as a truly authentic voice that whatever topic she speaks on, people feel that it's really coming from her heart," said Democratic strategist Mary Anne Marsh."

"Michelle Obama is the most memorable lines of the Democratic convention, and she can be the emotional center to a campaign," said Clinton communications director Jennifer Palmieri. "For the first time, it isn't just for the people who are supporting their candidate. It's for the person she thinks can best reflect their values.

"It's a reality, and it's important to talk about it in this current climate." 

"Michelle Obama is an authentic voice that whatever topic she speaks on, people feel that it's really coming from her heart," said Democratic strategist Mary Anne Marsh."

"Michelle Obama has a big stage because she has an impressive record of service as First Lady, and she has a unique position in the political landscape."

"Michelle Obama has been a crucial asset who can connect with independent and undecided voters. That's why we are so happy to have her here."

Pumpkin patch brings blessings to families

LINDSEY MCLEMORE

For 11 years, Waco families have headed to the pumpkin patch at Central Christian Church, Waco. Every October, the church’s garden hill is covered in pumpkins of all shapes and sizes. Families are invited to pick pumpkins, share stories, play with their pets and even watch a movie.

“I look forward to working in the patch every year,” said Lynda Robinson, a retired first-grade teacher, reads for field trips where Skeen, a church deacon. “I enjoy the patch every year, “ said Lynda Robinson, a retired first-grade teacher, who reads for field trips where Skeen, a church deacon. “I enjoy the patch every year,” Skeen said. “One of my favorite things about working in the pumpkin patch every year is hearing stories that children and youth ministries often hear stories about children and youth ministries often hear stories. Skeen said. “In November, we take our charitable efforts throughout the community.”

The remaining funds are used for community engagement and charitable efforts throughout the rest of the year. The pumpkin patch at Central Christian Church is located at 5901 Lake Shore Dr. and is open from 6 a.m. to 10 p.m. year round and charges $12 a night for tent nights. Friday and Saturday, the high is expected to be sunny, 77 degrees, so have a splash at the Lake Waco and make some late-night s’mores.

Some great haunts

“We have a few very good spots, from haunted houses to outdoor mazes, from outdoor mazes to haunted houses, we have a few very good spots that you can check out. Located at 4601 Elm I-35 N Elm Mott, Texas, Midnight Park, Waco, Texas, is about 15 minutes away from Waco, the ISU administration, has given you into two haunted houses. From 6 p.m. to 11:55 p.m. Friday and Saturday, there will be no terror but a costume contest. The Deadzone and Charming Nightmares Haunted Houses open dates are listed on heartworld.com.

The Bears won 22 games in 2015-16 season, as they recorded the program's eighth 20-win season in the last nine years. The Bears have averaged 21.6 wins per season since 2007-08.

As head coach Scott Drew enters his 14th season at Baylor, he hopes to guide the Bears to their third consecutive NCAA Tournament bid for the first time in program history. Leading this hungy and motivated squad of players will be senior guard Ishmail Wainright and junior guard Al Freeman. Both Wainright and Freeman played and started all 34 games during the 2015-16 campaign. Although Freeman saw more minutes on the court than Wainwright, both made their presence known in most games.

Freeman averaged 3.6 minutes a game and 1.1 points per game on the season. Wainright ended the season with a 46.9 percent three-point percentage and an overall shot percentage of 46.2 percent, while averaging 4.2 rebounds per game and 1.0 steals.

Together, these two have proven from last season that they can definitely handle the pressure that comes with being leaders on this team. These will be the two to keep your eyes on to take Baylor back to the March Madness bracket this season with a possible automatic bid from winning the Big 12 conference. The Bears should definitely be able to get past the haunting first round of the NCAA tournament, where they have fallen in the past two seasons.

Although Wainwright and Freeman may be the ones the Bears look up to as the season progresses, they will be joined by four returning letterwinners from last season, including 2017 preseason All-Big 12 honoree junior forward Jonathan Motley, junior forward Terry Maston, sophomore guard Jake Lindsey and sophomore guard King McClure.

Freshman guard Wendell Mitchell and freshman forward Jo Lual-Acuil Jr. are also expected to make their debuts after sitting out last season. In addition, junior college transfer forward Nuni Omot, freshman forward Mark Vital, freshman guard Terry Maston, sophomore guard Mike Claytor and sophomore guard Ishmail Wainright are all expected to contribute.

With newcomers and returners in the mix, the Bears look to start off on a good note at 6 p.m. Nov. 11 as they take Oral Roberts at the Ferrell Center. The Bears won 82-54.
